Beginner's Japanese Helen Gilhooly,2003 Japanese has become increasingly popular as a language to learn in recent

years, and a growing awareness of Japan has been created through industry, television, newspaper articles, Japanese events and exhibitions. 'Teach Yourself Beginner's Japanese' is the right course for you if you really want to learn Japanese but are daunted by the prospect of complicated grammar, classes and coursebooks. This book starts right from the beginning and explains everything in simple English. There are hints throughout to make learning easy and you can learn at your own pace with plenty of practice of each new point. It is a friendly introduction to the language which will help you to understand and speak Japanese sufficiently well to function effectively in basic everyday situations, both business and social. The course will also offer you an insight into Japanese culture and there is even an opportunity for you to learn some of the basics of reading Japanese if you want to. The book is divided into two main parts. Units 1-12 introduce you to the basic structures and grammatical points you'll need in everyday situations. Units 14-20 deal with everyday situations such as shopping, eating out, travelling, meeting a Japanese business person and entertaining a Japanese person in your home. They give you the opportunity to put into practice and consolidate the language you have learnt in the first 12 units. Unit 13 is a special unit designed to give you the chance to find out something about reading Japanese. If you would rather miss this unit out and concentrate on speaking and listening, you can do so without it affecting your understanding of the other units. All the Japanese in other units is given in romanization. By the end of the course you'll be able to communicate in a wide range of real-life situations and have all the practical information you need to enjoy your next trip to Japan. Truth and Post-Truth in Public Policy Frank Fischer,2021-12-09 The phenomenon of post-truth poses a problem for the public policy-oriented sciences, including policy analysis. Along with "fake news," the post-truth denial of facts constitutes a major concern for numerous policy fields. Whereas a standard response is to call for more and better factual information, this Element shows that the effort to understand this phenomenon has to go beyond the emphasis on facts to include an understanding of the social meanings that get attached to facts in the political world of public policy. The challenge is thus seen to be as much about a politics of meaning as it is about epistemology. The analysis here supplements the examination of facts with an interpretive policy-analytic approach to gain a fuller understanding of post-truth. The importance of the interpretive perspective is illustrated by examining the policy arguments that have shaped policy controversies related to climate change and coronavirus denial.

Impacting Nursing Student Learning Outcomes Through Use of a Multimedia Elearning Module Ann Marie Helmstedter,2017 The purpose of this capstone project was to determine if the integration of ATI's Nurse Logic 2.0 impacted the ATI Fundamentals 2013 proctored exam student learning outcomes of associate degree in nursing (ADN) students taking

a Fundamentals course at a community college in Ohio. Mayer's Cognitive Theory of Multimedia Learning (CTML) was used as a guiding principle to ensure proper implementation of the ATI Nurse Logic 2.0 multimedia eLearning modules. The results of this capstone project indicated that the integration of ATI's Nurse Logic 2.0 did not impact the ATI Fundamentals 2013 proctored exam scores and the null hypothesis was accepted. The results of this study were likely impacted by the limitations of the study including the varying medical backgrounds of the Fundamentals students and the distractors student's experiences when completing the ATI Nurse Logic 2.0 modules outside of class time. Also, there was an uneven distribution of students before and after the implementation of the ATI Nurse Logic 2.0 modules during the retrospective data collection period due to inclusion and exclusion criteria and because enrollment at the college declined. Implications of this capstone project support that the integration of a multimedia eLearning module does not impact student knowledge and retention.
