Let History into the Mathematics Classroom Évelyne Barbin, Jean-Paul Guichard, Marc Moyon, Patrick Guyot, Catherine Morice-Singh, Frédéric Métin, Martine Bühler, Dominique Tournès, Renaud Chorlay, Gérard Hamon, 2017-10-27 This book brings together 10 experiments which introduce historical perspectives into mathematics classrooms for 11 to 18-year-olds. The authors suggest that students should not only read ancient texts, but also should construct, draw and manipulate. The different chapters refer to ancient Greek, Indian, Chinese and Arabic mathematics as well as to contemporary mathematics. Students are introduced to well-known mathematicians—such as Gottfried Leibniz and Leonard Euler—as well as to less famous practitioners and engineers. Always, there is the attempt to associate the experiments with their scientific and cultural contexts. One of the main values of history is to show that the notions and concepts we teach were invented to solve problems. The different chapters of this collection all have, as their starting points, historic problems—mathematical or not. These are problems of exchanging and sharing, of dividing figures and volumes as well as engineers' problems, calculations, equations and congruence. The mathematical reasoning which accompanies these actions is illustrated by the use of drawings, folding, graphical constructions and the production of machines.

Indigenous and Decolonizing Studies in Education Linda Tuhiwai Smith, Eve Tuck, K. Wayne Yang, 2018-06-14 Indigenous and decolonizing perspectives on education have long persisted alongside colonial models of education, yet too often have been subsumed within the fields of multiculturalism, critical race theory, and progressive education. Timely and compelling, *Indigenous and Decolonizing Studies in Education* features research, theory, and dynamic foundational readings for educators and educational researchers who are looking for possibilities beyond the limits of liberal democratic schooling. Featuring original chapters by authors at the forefront of theorizing, practice, research, and activism, this volume helps define and imagine the exciting interstices between Indigenous and decolonizing studies and education. Each chapter forwards Indigenous principles - such as Land as literacy and water as life - that are grounded in place-specific efforts of creating Indigenous universities and schools, community organizing and social movements, trans and Two Spirit practices,

refusals of state policies, and land-based and water-based pedagogies.

Oil, Power, and War Matthieu Auzanneau, 2020-02-20 The story of oil is one of hubris, fortune, betrayal, and destruction. It is the story of a resource that has been undeniably central to the creation of our modern culture, and ever-present during the darkest exploits of empire the world over. For the past 150 years, oil has become the most essential ingredient for economic, military, and political power. And it has brought us to our present moment in which political leaders and the fossil-fuel industry consider extraordinary, and extraordinarily dangerous, policy on a world stage marked by shifting power bases. Upending the conventional wisdom by crafting a “people’s history,” award-winning journalist Matthieu Auzanneau deftly traces how oil became a national and then global addiction, outlines the enormous consequences of that addiction, sheds new light on major historical and contemporary figures, and raises new questions about stories we thought we knew well: What really sparked the oil crises in the 1970s, the shift away from the gold standard at Bretton Woods, or even the financial crash of 2008? How has oil shaped the events that have defined our times: two world wars, the Cold War, the Great Depression, ongoing wars in the Middle East, the advent of neoliberalism, and the Great Recession, among them? With brutal clarity, *Oil, Power, and War* exposes the heavy hand oil has had in all of our lives—and illustrates how much heavier that hand could get during the increasingly desperate race to control the last of the world’s easily and cheaply extractable reserves.

Father Goriot Honoré de Balzac, The novel takes place during the Bourbon Restoration, which brought about profound changes in French society; the struggle of individuals to secure upper-class status is ubiquitous in the book. The city of Paris also impresses itself on the characters – especially young Rastignac, who grew up in the provinces of southern France. Balzac analyzes, through Goriot and others, the nature of family and marriage, providing a pessimistic view of these institutions.

The Cost of Air Pollution ,2014 Outdoor air pollution kills more than 3 million people across the world every year, and causes health problems from asthma to heart disease for many more. This is costing societies very large amounts in terms of the value of lives lost and ill health. Based on extensive new epidemiological evidence since the 2010 Global Burden of Disease study, and OECD estimates of the Value of Statistical Life, this report provides evidence on the health impacts from air pollution and the related economic costs.

Unbuttoned Christopher Dummitt,2017-05-01 When Prime Minister William Lyon Mackenzie King died in 1950, the public knew little about his eccentric private life. In his final will King ordered the destruction of his private diaries, seemingly securing his privacy for good. Yet twenty-five years after King's death, the public was bombarded with stories about Weird Willie, the prime minister who communed with ghosts and cavorted with prostitutes. Unbuttoned traces the transformation of the public's knowledge and opinion of King's character, offering a compelling look at the changing way Canadians saw themselves and measured the importance of their leaders' personal lives. Christopher Dummitt relates the strange posthumous tale of King's diary and details the specific decisions of King's literary executors. Along the way we learn about a thief in the public archives, stolen copies of King's diaries being sold on the black market, and an RCMP hunt for a missing diary linked to the search for Russian spies at the highest levels of the Canadian government. Analyzing writing and reporting about King, Dummitt concludes that the increasingly irreverent views of King can be explained by a fundamental historical transformation that occurred in the era in which King's diaries were released, when the rights revolution, Freud, 1960s activism, and investigative journalism were making self-revelation a cultural preoccupation. Presenting extensive archival research in a captivating narrative, Unbuttoned traces the rise of a political culture that privileged the individual as the ultimate source of truth, and made Canadians rethink what they wanted to know about politicians.

The World Chronicle of Guillaume de Nangis Daniel Williman,Karen Corsano,2020-09-07 The core of this book is the life story of a manuscript codex, British Library Royal MS 13 E IV: the Latin Chronicle (from the Creation to 1300) of Guillaume de Nangis, copied in the abbey library of St-Denis-en-France. The authors shed new light on the production process, identifying the illuminator of the Royal MS and naming the scribe. Detailed evidence links the codex to important events in history, such as the Council of Constance, and famous actors like Jean de France, duc de Berry, Sigismund of Luxembourg,

Thomas Howard, duke of Norfolk, and Henry VIII, to name a few. The authors show how it traveled from one capital to the other, narrating the entire life and interesting times of this codex. Another dimension of this study accounts for all twenty-two copies of the Chronicle, now scattered in nine cities from London to Vienna, placing each one in a scrupulously drawn stemma codicum and sketching its history.

Race and Writing Assessment Asao B. Inoue, Mya Poe, 2012 This book won the 2014 CCCC (Conference on College Composition and Communication) Outstanding Book Award - Edited Collection Race and Writing Assessment brings together established and up-and-coming scholars in composition studies to explore how writing assessments need to change in order to account for the increasing diversity of students in college classrooms today. Contributors identify where we have ignored race in our writing assessment approaches and explore issues related to assessment technologies, faculty and student responses to assessment, institutional responses to writing assessment, and context for assessing writing beyond composition programs. Balancing practical advice and theoretical discussions, Race and Writing Assessment provides a variety of models, frameworks, and research methods to consider writing assessment approaches that are sensitive to the linguistic and cultural identities that diverse students bring to writing classrooms. This book illustrates that this is no one-size-fits-all model for addressing diversity in assessment practice but that assessment practices attuned to racial diversity must be rooted in the contexts in which they are found. In doing so, Race and Writing Assessment enriches contemporary research on contextualized approaches to writing assessment.

Anthropocene: A Very Short Introduction Erle C. Ellis, 2018-02-22 The proposal that the impact of humanity on the planet has left a distinct footprint, even on the scale of geological time, has recently gained much ground. Global climate change, shifting global cycles of the weather, widespread pollution, radioactive fallout, plastic accumulation, species invasions, the mass extinction of species - these are just some of the many indicators that we will leave a lasting record in rock, the scientific basis for recognizing new time intervals in Earth's history. The Anthropocene, as the proposed new epoch has been named, is regularly in the news. Even with such robust evidence, the proposal to formally recognize our current time as the Anthropocene remains controversial both inside and outside the scholarly world, kindling intense debates. The reason is clear. The Anthropocene represents far more than just another interval of geologic time. Instead, the Anthropocene has emerged as a powerful new narrative, a concept through which age-old questions about the meaning of nature and even the nature of humanity are being revisited and radically revised. This Very Short Introduction explains the science behind the Anthropocene and the many proposals about when to mark its beginning: the nuclear tests of the 1950s? The beginnings of agriculture? The origins of humans as a species? Erle Ellis considers the many ways that the Anthropocene's evolving paradigm is reshaping the sciences, stimulating the humanities, and foregrounding the politics of life on a planet transformed

by humans. The Anthropocene remains a work in progress. Is this the story of an unprecedented planetary disaster? Or of newfound wisdom and redemption? Ellis offers an insightful discussion of our role in shaping the planet, and how this will influence our future on many fronts. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Dictionnaire économique et juridique Jean Baleyte,1992

Bel Ami Guy de Maupassant,2020-02-15 After changing his five-franc piece Georges Duroy left the restaurant. He twisted his mustache in military style and cast a rapid, sweeping glance upon the diners, among whom were three saleswomen, an untidy music-teacher of uncertain age, and two women with their husbands. When he reached the sidewalk, he paused to consider what route he should take. It was the twenty-eighth of June and he had only three francs in his pocket to last him the remainder of the month. That meant two dinners and no lunches, or two lunches and no dinners, according to choice. As he pondered upon this unpleasant state of affairs, he sauntered down Rue Notre Dame de Lorette, preserving his military air and carriage, and rudely jostled the people upon the streets in order to clear a path for himself. He appeared to be hostile to the passers-by, and even to the houses, the entire city. Tall, well-built, fair, with blue eyes, a curled mustache, hair naturally wavy and parted in the middle, he recalled the hero of the popular romances. It was one of those sultry, Parisian evenings when not a breath of air is stirring; the sewers exhaled poisonous gases and the restaurants the disagreeable odors of cooking and of kindred smells. Porters in their shirt-sleeves, astride their chairs, smoked their pipes at the carriage gates, and pedestrians strolled leisurely along, hats in hand. When Georges Duroy reached the boulevard he halted again, undecided as to which road to choose. Finally he turned toward the Madeleine and followed the tide of people. - Taken from Bel Ami written by Guy de Maupassant
