*Let History into the Mathematics Classroom* Évelyne Barbin,Jean-Paul Guichard,Marc Moyon,Patrick Guyot,Catherine Morice-Singh,Frédéric Métin,Martine Bühler,Dominique Tournès,Renaud Chorlay,Gérard Hamon,2017-10-27 This book brings together 10 experiments which introduce historical perspectives into mathematics classrooms for 11 to 18-year-olds. The authors suggest that students should not only read ancient texts, but also should construct, draw and manipulate. The different chapters refer to ancient Greek, Indian, Chinese and Arabic mathematics as well as to contemporary mathematics. Students are introduced to well-known mathematicians—such as Gottfried Leibniz and Leonard Euler—as well as to less famous practitioners and engineers. Always, there is the attempt to associate the experiments with their scientific and cultural contexts. One of the main values of history is to show that the notions and concepts we teach were invented to solve problems. The different chapters of this collection all have, as their starting points, historic problems—mathematical or not. These are problems of exchanging and sharing, of dividing figures and volumes as well as engineers' problems, calculations, equations and congruence. The mathematical reasoning which accompanies these actions is illustrated by the use of drawings, folding, graphical constructions and the production of machines.

*The Rejection of Consequentialism* Samuel Scheffler,1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of

consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

**Decolonizing Education** Marie Battiste,2019-01-31 Drawing on treaties, international law, the work of other Indigenous scholars, and especially personal experiences, Marie Battiste documents the nature of Eurocentric models of education, and their devastating impacts on Indigenous knowledge. Chronicling the negative consequences of forced assimilation, racism inherent to colonial systems of education, and the failure of current educational policies for Aboriginal populations, Battiste proposes a new model of education, arguing the preservation of Aboriginal knowledge is an Aboriginal right. Central to this process is the repositioning of Indigenous humanities, sciences, and languages as vital fields of knowledge, revitalizing a knowledge system which incorporates both Indigenous and Eurocentric thinking.

*Indigenous and Decolonizing Studies in Education* Linda Tuhiwai Smith,Eve Tuck,K. Wayne Yang,2018-06-14 Indigenous and decolonizing perspectives on education have long persisted alongside colonial models of education, yet too often have been subsumed within the fields of multiculturalism, critical race theory, and progressive education. Timely and compelling, *Indigenous and Decolonizing Studies in Education* features research, theory, and dynamic foundational readings for educators and educational researchers who are looking for possibilities beyond the limits of liberal democratic schooling. Featuring original chapters by authors at the forefront of theorizing, practice, research, and activism, this volume helps define and imagine the exciting interstices between Indigenous and decolonizing studies and education. Each chapter forwards Indigenous principles - such as Land as literacy and water as life - that are grounded in place-specific efforts of creating Indigenous universities and schools, community organizing and social movements, trans and Two Spirit practices, refusals of state policies, and land-based and water-based pedagogies.

*The Cost of Air Pollution* ,2014 Outdoor air pollution kills more than 3 million people across the world every year, and causes health problems from asthma to heart disease for many more. This is costing societies very large amounts in terms of the value of lives lost and ill health. Based on extensive new epidemiological evidence since the 2010 Global Burden of Disease study, and OECD estimates of the Value of Statistical Life, this report provides evidence on the health impacts from air pollution and the related economic costs.

SubGeniusThe underground cult bestseller! Essays that redefine the psychogeographical nooks of autonomy. Recipes for poetic terror, anarcho -black magic, post-situ psychotropic surgery, denunciations of spiritual addictions to vapid infotainment cults -- this is the bastard classic, the watermark impressed upon our minds. Where conscience informs praxis, and action infects consciousness, T.A.Z. is beginning to worm its way into above-ground culture.This book offers inspired blasts of writing, from slogans to historical essays, on the need to insert revolutionary happiness into everyday life through poetic action, and celebrating the radical optimism present in outlaw cultures. It should appeal to alternative thinkers and punks everywhere, as it celebrates liberation, love and poetic living.The new edition contains the full text of Chaos: The Broadsheets of Ontological Anarchism, the complete communiques and flyers of the Association fo Ontological Anarchy, the long essay 'The Temporary Autonomous Zone,' and a new preface by the author.'A literary masterpiece...' Freedom'A linguistic romp...' Colin Wilson'Fascinating...' William Burroughs

**Oil, Power, and War** Matthieu Auzanneau,2020-02-20 The story of oil is one of hubris, fortune, betrayal, and destruction. It is the story of a resource that has been undeniably central to the creation of our modern culture, and ever-present during the darkest exploits of empire the world over. For the past 150 years, oil has become the most essential ingredient for economic, military, and political power. And it has brought us to our present moment in which political leaders and the fossil-fuel industry consider extraordinary, and extraordinarily dangerous, policy on a world stage marked by shifting power bases. Upending the conventional wisdom by crafting a “people’s history,” award-winning journalist Matthieu Auzanneau deftly traces how oil became a national and then global addiction, outlines the enormous consequences of that addiction, sheds new light on major historical and contemporary figures, and raises new questions about stories we thought we knew well: What really sparked the oil crises in the 1970s, the shift away from the gold standard at Bretton Woods, or even the financial crash of 2008? How has oil shaped the events that have defined our times: two world wars, the Cold War, the Great Depression, ongoing wars in the Middle East, the advent of neoliberalism, and the Great Recession, among them? With brutal clarity, Oil, Power, and War exposes the heavy hand oil has had in all of our lives—and illustrates how much heavier that hand could get during the increasingly desperate race to control the last of the world’s easily and cheaply extractable reserves.

**The Landscape Approach** Bernard Lassus,1998 A familiarity with the work of Bernard Lassus, the leading French landscape architect, is essential for anyone seriously interested in contemporary landscape experience and design. Now, with this first collection of his writings to be translated into English, the contributions of Lassus can finally be fully appreciated by

a wider audience. Perhaps best known for the speculative base that sustains his work and thought, Lassus is an artist whose philosophical concerns precede and determine his design work. For him, attention to the interactive nature of the landscape underlies all projects. He approaches each site in pursuit of the particular opportunities and challenges it presents and is ever mindful of the way in which observers will experience the space. He does not allow experience to be relegated to by-product of design. Instead, as one of his close collaborators explained, for Lassus form is not primary, it is induced from the articulation of intention. The essays in *The Landscape Approach* afford readers a look into some of Lassus's most important projects--the Butterfly Bridge at Istres, the highway rest area at Nimes-Caissargues, the Park of Duisburg-Nord, the Garden of Returns for the Corderie Royale at Rochefort, and the Tuileries in Paris--and furnish provocative insight into Lassus's unique bonding of theory and practice. As is the case with his garden designs, Bernard Lassus's volume is a true experience. It is sure to become a classic in the field.

*Bel-Ami* Guy de Maupassant,2021-10-13 *Bel-Ami* Guy De Maupassant - The story chronicles journalist Georges Duroy's corrupt rise to power from a poor ex-NCO to one of the most successful men in Paris, most of which he achieves by manipulating a series of powerful, intelligent, and wealthy mistresses.

**Pedagogic Rights and Democratic Education** Philippe Vitale,Beryl Exley,2015-07-24 The basis of Bernstein's sociology of education lays in is his theorisation of the different approaches to curriculum, pedagogy and assessment and the implications for pedagogic rights and social justice. This edited collection presents 15 empirical case studies and theoretical accounts from 22 international scholars who focus on the experiences of students and teachers in contexts marked by economic, social, cultural, linguistic and/or geographic diversity. Located in systems of education in Australia, France, Germany, Greece, Portugal, South Africa and the United States, each chapter contributes to a better understanding of the conditions of a democratic education across time and place.

**The World Chronicle of Guillaume de Nangis** Daniel Williman,Karen Corsano,2020-09-07 The core of this book is the life story of a manuscript codex, British Library Royal MS 13 E IV: the Latin Chronicle (from the Creation to 1300) of Guillaume de Nangis, copied in the abbey library of St-Denis-en-France. The authors shed new light on the production process, identifying the illuminator of the Royal MS and naming the scribe. Detailed evidence links the codex to important events in history, such as the Council of Constance, and famous actors like Jean de France, duc de Berry, Sigismund of Luxembourg, Thomas Howard, duke of Norfolk, and Henry VIII, to name a few. The authors show how it traveled from one capital to the other, narrating the entire life and interesting times of this codex. Another dimension of this study accounts for all twenty-two copies of the Chronicle, now scattered in nine cities from London to Vienna, placing each one in a scrupulously drawn stemma codicum and sketching its history.

The Burgess Shale Margaret Atwood,2017-03 Margaret Atwood considers the Canadian literary landscape of the 1960s

to be like the Burgess Shale, a geological formation that contains the fossils of many weird and strange early life forms, different from but not unrelated to contemporary writerly ones. The Burgess Shale is not all about writerly pursuits, though. Atwood also gives readers some insight into the fashions and foibles of the times. Her recollections and anecdotes offer a wry and often humorous look at the early days of the institutions taken for granted today--from writers' unions and grant programs to book tours and festivals.--

*Unbuttoned* Christopher Dummitt,2017-05-01 When Prime Minister William Lyon Mackenzie King died in 1950, the public knew little about his eccentric private life. In his final will King ordered the destruction of his private diaries, seemingly securing his privacy for good. Yet twenty-five years after King's death, the public was bombarded with stories about Weird Willie, the prime minister who communed with ghosts and cavorted with prostitutes. *Unbuttoned* traces the transformation of the public's knowledge and opinion of King's character, offering a compelling look at the changing way Canadians saw themselves and measured the importance of their leaders' personal lives. Christopher Dummitt relates the strange posthumous tale of King's diary and details the specific decisions of King's literary executors. Along the way we learn about a thief in the public archives, stolen copies of King's diaries being sold on the black market, and an RCMP hunt for a missing diary linked to the search for Russian spies at the highest levels of the Canadian government. Analyzing writing and reporting about King, Dummitt concludes that the increasingly irreverent views of King can be explained by a fundamental historical transformation that occurred in the era in which King's diaries were released, when the rights revolution, Freud, 1960s activism, and investigative journalism were making self-revelation a cultural preoccupation. Presenting extensive archival research in a captivating narrative, *Unbuttoned* traces the rise of a political culture that privileged the individual as the ultimate source of truth, and made Canadians rethink what they wanted to know about politicians.

*Anthropocene: A Very Short Introduction* Erle C. Ellis, 2018-02-22 The proposal that the impact of humanity on the planet has left a distinct footprint, even on the scale of geological time, has recently gained much ground. Global climate change, shifting global cycles of the weather, widespread pollution, radioactive fallout, plastic accumulation, species invasions, the mass extinction of species - these are just some of the many indicators that we will leave a lasting record in rock, the scientific basis for recognizing new time intervals in Earth's history. The Anthropocene, as the proposed new epoch has been named, is regularly in the news. Even with such robust evidence, the proposal to formally recognize our current time as the Anthropocene remains controversial both inside and outside the scholarly world, kindling intense debates. The reason is clear. The Anthropocene represents far more than just another interval of geologic time. Instead, the Anthropocene has emerged as a powerful new narrative, a concept through which age-old questions about the meaning of nature and even the nature of humanity are being revisited and radically revised. This Very Short Introduction explains the science behind the Anthropocene and the many proposals about when to mark its beginning: the nuclear tests of the 1950s? The beginnings of agriculture? The origins of humans as a species? Erle Ellis considers the many ways that the Anthropocene's evolving paradigm is reshaping the sciences, stimulating the humanities, and foregrounding the politics of life on a planet transformed by humans. The Anthropocene remains a work in progress. Is this the story of an unprecedented planetary disaster? Or of newfound wisdom and redemption? Ellis offers an insightful discussion of our role in shaping the planet, and how this will influence our future on many fronts. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

**Race and Writing Assessment** Asao B. Inoue, Mya Poe, 2012 This book won the 2014 CCCC (Conference on College Composition and Communication) Outstanding Book Award - Edited Collection Race and Writing Assessment brings together established and up-and-coming scholars in composition studies to explore how writing assessments needs to change in order to account for the increasing diversity of students in college classrooms today. Contributors identify where we have ignored race in our writing assessment approaches and explore issues related to assessment technologies, faculty and student responses to assessment, institutional responses to writing assessment, and context for assessing writing beyond composition programs. Balancing practical advice and theoretical discussions, Race and Writing Assessment provides a variety of models, frameworks, and research methods to consider writing assessment approaches that are sensitive to the linguistic and cultural identities that diverse students bring to writing classrooms. This book illustrates that this is no one-size-fits-all model for addressing diversity in assessment practice but that assessment practices attuned to racial diversity must be rooted in the

contexts in which they are found. In doing so, Race and Writing Assessment enriches contemporary research on contextualized approaches to writing assessment.
