Cohn,2019-06-28 Tele-AAC: Augmentative and Alternative Communication Through Telepractice is the first comprehensive resource guide to Tele-AAC. Tele-AAC is the use of telepractice specifically for providing services to individuals using augmentative and alternative communication (AAC). This text establishes Tele-AAC as a new service delivery model and promotes safe, efficacious, evidence-based, and ethical telepractice for individuals who need AAC systems. The goal is to provide readers with fundamental information about policy and service delivery of AAC services via telepractice to enable clinical practice. The text details the specific technical components unique to Tele-AAC service delivery, and how the technology, personnel, and service delivery practices may vary across settings and populations. It offers didactic and case-based content for speech-language pathologists across all levels, from introductory to advanced. Chapters are included that clarify and define the term Tele-AAC, highlight the procedures used while providing assessment and intervention via Tele-AAC, identify ethical and cultural considerations while providing Tele-AAC, and demonstrate its application in a variety of settings. The content has been enriched by the input and knowledge offered by leaders from both telepractice and AAC disciplines, and offers readers the right combination of foundational information and principles to help form a base of understanding for practitioners engaging in Tele-AAC. The field of Tele-AAC is evolving and will transform as the technology changes and advances. This text provides a threshold of understanding from which the field and practitioners can grow.

**Beaver Steals Fire** Confederated Salish and Kootenai Tribes,2008-01-01 A long time ago, fire belonged only to the animals in the land above, not to those on the earth below. Curlew, keeper of the sky world, guarded fire and kept it from the earth. Coyote, however, devised a clever plan to steal fire, aided by Grizzly Bear, Wren, Snake, Frog, Eagle, and Beaver. These brave and resourceful animal beings raided the land above and risked all to steal fire from Curlew. *Beaver Steals Fire* is an ancient and powerful tale springing from the hearts and experiences of the Salish people of Montana. Steeped in the rich and culturally vital storytelling tradition of the tribe, this tale teaches both respect for fire and awareness of its significance, themes particularly relevant today. This unforgettable version of the story is told by Salish elder Johnny Arlee and beautifully illustrated by tribal artist Sam Sandoval.

*Autonomy in Language Learning and Teaching* Alice Chik, Naoko Aoki, Richard Smith, 2016-01-12 This book seeks to expand the research agendas on autonomy in language learning and teaching in diverse contexts, by examining the present landscape of established studies, identifying research gaps and providing practical future research directions. Based on empirical studies, it explores research agendas in five emerging domains: language learning and teaching in developing countries; social censure and teacher autonomy; learner autonomy and groups; learner autonomy and digital practice; and finally, learner autonomy and space. In doing so, it sheds new light on the impact of digital media, group dynamics and the application of ecological perspectives on learner autonomy. The contributors present a novel reconsideration of new learning affordances, and their discussion of spatial dimensions provides much needed expansion in the field. This book will have international appeal and provide an invaluable resource for students and scholars of second language learning and higher education, as well as teacher educators. Chapter 2 of this book is open access under a CC BY 4.0 license via [https://link.springer.com/content/pdf/10.1057%2F978-1-137-52998-5\\_2.pdf](https://link.springer.com/content/pdf/10.1057%2F978-1-137-52998-5_2.pdf).

**Learner Autonomy and Web 2.0** Marco Cappellini, Tim Lewis, Annick Rivens Mompean, 2017 This volume explores tensions between the classical definitions of learner autonomy and the learning dynamics observed in specific online contexts. Some of the contributions argue for the emergence of actual new forms of autonomy, others consider that this is merely a case of old wine in new bottles. In this volume, autonomy is seen as emerging and developing in a complex relationship with L2 proficiency and other competencies. The volume takes an expansive view of what is meant by Web 2.0 and, as a result, a wide diversity of environments is featured, ranging from adaptive learning systems, through mobile apps, to social networking sites and - almost inevitably - MOOCs. Paradoxically, autonomy is seen to flourish in some quite restricted contexts, while in less constrained environments learners experience difficulty in dealing with a requirement to self-regulate. Individual chapters run the gamut of age groups, learning activities and online environments. The stage for all of them is set by an exchange in which David Little and Steve Thorne discuss the evolution of the concept of language learner autonomy, from its origins in the era of self-access resource centres to its more recent instantiations in online (and offline) learning communities. Subsequent contributors include an exploration how autonomy can be exercised even within the constraints of adaptive learning systems, a discussion of the metacognitive operations engaged in by autonomous adult learners in a French/Australian teletandem exchange, a look at an ecological paradigm of autonomy to conceptualise its emergence in relation to the use of mobile apps by primary- and secondary-level language learners in Canada, a study of how learner autonomy with a markedly social and empathic dimension drives collaboration in a Facebook-based collaborative writing project, an analysis of the difficulties encountered by a group of trainee language teachers in engaging with a range

of language MOOCs and finally a study of how autonomy is experienced by advanced learners of English with a preference for online informal learning based on gaming and streamed video.
