Nov 24, 2021 · The enclosures will be the first built by Magna for Ford in the North American market. Their aluminum extrusions and stampings are assembled using a combination of laser hybrid and cold metal transfer (CMT) welding. Magna offers battery enclosures made from steel, aluminum and multi-material configurations, including lightweight composites.

googlemail

The FA20D engine had an aluminium alloy cylinder head with chain-driven double overhead camshafts. The four valves per cylinder – two intake and two exhaust – were actuated by roller rocker arms which had built-in needle bearings that reduced the friction that occurred between the camshafts and the roller rocker arms (which actuated the valves).
