Modern Marine Internal Combustion Engines Ievgen Bilousov, Mykola Bulgakov, Volodymyr Savchuk, 2020-06-30 This book offers a comprehensive and timely overview of internal combustion engines for use in marine environments. It reviews the development of modern four-stroke marine engines, gas and gas-diesel engines and low-speed two-stroke crosshead engines, describing their application areas and providing readers with a useful snapshot of their technical features, e.g. their dimensions, weights, cylinder arrangements, cylinder capabilities, rotation speeds, and exhaust gas temperatures. For each marine engine, information is provided on the manufacturer, historical background, development and technical characteristics of the manufacturer's most popular models, and detailed drawings of the engine, depicting its main design features. This book offers a unique, self-contained reference guide for engineers and professionals involved in shipbuilding. At the same time, it is intended to support students at maritime academies and university students in naval architecture/marine engineering with their design projects at both master and graduate levels, thus filling an important gap in the literature.

Marine Diesel Basics 1 Dennison Berwick, 2017-05-11 Seeing is Understanding. The first VISUAL guide to marine diesel systems on recreational boats. Step-by-step instructions in clear, simple drawings explain how to maintain, winterize and recommission all parts of the system - fuel deck fill - engine - batteries - transmission - stern gland - propeller. Book one of a new series. Canadian author is a sailor and marine mechanic cruising aboard his 36-foot steel-hulled Chevrier sloop. Illustrations: 300+ drawings Pages: 222 pages Published: 2017 Format: softcover Category: Inboards, Gas & Diesel

The Asian Financial Crisis Shalendra Sharma,2018-07-30 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. The Asian financial crisis of 1997-98 shook the foundations of the global economy and what began as a localised currency crisis soon engulfed the entire Asian region. What went wrong and how did the Asian economies long considered 'miracles' respond? How did the United States, Japan and other G-7 countries respond to the crisis? What role did the IMF play?. Why did China, which suffers many of the same structural problems responsible for the crisis remain conspicuously insulated from the turmoil raging in its midst?. What explains the remarkable recovery

now underway in Asia? In what fundamental ways did the Asian crisis serve as a catalyst to the current thinking about the new international financial architecture?. This book provides answers to all the above questions and more, and gives a comprehensive account of how the international economic order operates, examines its strengths and weaknesses, and what needs to be done to fix it.

Small Country Innovation Systems Charles Edquist, Leif Hommen, 2009-01-01 What are the challenges that small countries face concerning innovation and what are the effects of globalization on their innovation systems? In this very interesting, rich and timely book, Edquist and Hommen compare ten different small national innovation systems from the Asia Pacific and Northern Europe that are rather advanced in their development. The answers that the authors give are convincing and relate not only to the unique characteristics of each national system that shapes innovative activity, but also to some commonalities that exist across these countries. Franco Malerba, Bocconi University, Italy This major book presents case studies of ten small country national systems of innovation (NSIs) in Europe and Asia, namely, Denmark, Finland, Hong Kong, Ireland, the Netherlands, Norway, Singapore, South Korea, Sweden and Taiwan. These cases have been carefully selected as examples of success within the context of globalization and as new economies where competition is increasingly based on innovation. To facilitate comparative analysis the ten studies follow a common structure, informed by an activities-based approach to describing and analysing NSIs, which addresses the critical issues of globalization and the consequences of innovation for economic performance. The final chapter compares fast growth and slow growth countries, concentrating on issues of innovation policy. The results illustrate the usefulness of an activities-based approach to studying NSIs, point to distinctive national roles within an increasingly differentiated international division of labour and address the key themes of selectivity and coordination in innovation policy. This valuable book presents one of the most significant, comprehensive and comparative country studies of NSIs in the last decade. It will have great import and should be widely read by every serious student and scholar of innovation studies.
