Cartoons and Their Influence - Novak Djokovic Foundation

The influence of the crop type on the crop water need is important in two ways: 1. The crop type has an influence on the daily water needs of a fully grown crop; i.e. the peak daily water needs: a fully developed maize crop will need more water per day than a fully developed crop of onions. 2. The crop type has an influence on the duration of the total growing season of the crop.
