**Owen Hatherley**

**Lincoln Center Inside Out** Diller Scofidio + Renfro, Elizabeth Diller, Ricardo Scofidio, 2012 The redesign of Lincoln Center is one of the most challenging and innovative civic projects in recent urban history. Over the past eight years Diller Scofidio + Renfro, in close collaboration with Lincoln Center's leadership, has transformed the fifty year old Modernist citadel into a porous and democratic campus. This visually rich document is the first comprehensive book to feature the extensive redevelopment in its entirety. Through a combination of photographs, drawings, renderings, archival records and texts, the book describes the innovative strategies that have dissolved the public/private divide and effectively turned the campus inside-out, extending the spectacle of the performance halls into the Center's mute public spaces and surrounding streets. Conceived as a cross between an art book, a scholarly record, and an architectural diary this publication demonstrates how the recent redesign both respects and challenges preconceived notions about Lincoln Center and its ongoing role as a cultural hub in an ever-changing city. This unorthodox publication is comprised entirely of gatefolds; a series of inside-out centerfolds where the exterior pages of each spread feature glossy, large-format, full-bleed photographs highlighting different parts of the campus. Inside the gatefolds, tucked behind these lush photos, is a series of back stories that reveal the surprising evolution and unexpected afterlife of the same spaces.

Blur Elizabeth Diller, Ricardo Scofidio, 2002-09-03 The book, traces the creation, from conception to realization, of a media pavilion for the Swiss Expo.02 whose primary materials are steel and fog.

*Flesh* Elizabeth Diller, Ricardo Scofidio, 1996-01-01 Like all the work of architects Liz Diller + Ric Scofidio, *Flesh* is a set of contradictions and complexities. It is both a monograph of their work the first ever on their art, architecture, and installations but also not a traditional monograph. It is a both/and, neither/nor book-as-project noted at the time of its publication, in 1994, for its groundbreaking typography and not-too-subtle critique of architecture from within. Since its publication, Diller + Scofidio (now Diller Scofidio + Renfro) have gone on to become among the world's most famous architects, but the themes, concerns, and even forms that make them so celebrated today are all here in *Flesh*, along with its most radical proposition: that anything can be architecture, starting with this book, one of the most sought-after and valuable

books in our library.

**Site and Sound** Victoria Newhouse, 2012-04-10 Victoria Newhouse, noted author and architectural historian, addresses the aesthetics and acoustics in concert halls and opera houses of the past, present, and future in this stunning companion to the highly regarded *Towards a New Museum*. *Site and Sound* explores the daunting, perennial question: Does the music serve the space, or the other way around? Heavily illustrated throughout—with historic images, spectacular color photographs, detailed drawings—this volume is an informed and enjoyable presentation of a building type that is at the heart of cities small and large. Newhouse starts with a survey of venues from ancient Greek and Roman times and progresses to contemporary works around the world. She singles out Lincoln Center in particular for its long history and its transitions and remodelings over the years. Two major chapters cover the present: one focuses on recent work in the West, including the National Opera House of Norway in Oslo by Snøhetta (2008), the Casa da Música in Porto, Portugal, by Rem Koolhaas (2005), and many more; the second examines the boom in concert halls in China. A final chapter looks at projects that are currently planned and the future of an architecture for music.

*The Language of Architecture* Andrea Simitch, Val Warke, 2014-06-01 *DIV* Learning a new discipline is similar to learning a new language; in order to master the foundation of architecture, you must first master the basic building blocks of its language—the definitions, function, and usage. *Language of Architecture* provides students and professional architects with the basic elements of architectural design, divided into twenty-six easy-to-comprehend chapters. This visual reference includes an introductory, historical view of the elements, as well as an overview of how these elements can and have been used across multiple design disciplines. *DIV* Whether you're new to the field or have been an architect for years, you'll want to flip through the pages of this book throughout your career and use it as the go-to reference for inspiration, ideas, and reminders of how a strong knowledge of the basics allows for meaningful, memorable, and beautiful fashions that extend beyond trends. *DIV* This comprehensive learning tool is the one book you'll want as a staple in your library. *DIV*

**Never Built New York** Greg Goldin, Sam Lubell, 2016 Following on the success of *Never Built Los Angeles* (Metropolis Books, 2013), authors Greg Goldin and Sam Lubell now turn their eye to New York City. New York towers among world capitals, but the city we know might have reached even more stellar heights, or burrowed into more destructive depths, had the ideas pictured in the minds of its greatest dreamers progressed beyond the drawing board and taken form in stone, steel, and glass. What is wonderfully elegant and grand might easily have been ingloriously grandiose; what is blandly unremarkable, equally, might have become delightfully provocative or humanely inspiring. The ambitious schemes gathered here tell the story of a different skyline and a different sidewalk alike. Nearly 200 ambitious proposals spanning 200 years encompass bridges, skyscrapers, master plans, parks, transit schemes, amusements, airports, plans to fill in rivers and

extend Manhattan, and much, much more. Included are alternate visions for such landmarks as Central Park, Columbus Circle, Lincoln Center, MoMA, the U.N., Grand Central Station and the World Trade Centre site, among many others sites. Fact-filled and entertaining texts, as well as sketches, renderings, prints, and models drawn from archives all across the New York metropolitan region tell stories of a new New York, one that surely would have changed the way we inhabit and move through the city.

**What If ...?** Chee Pearlman, 2014 Widely admired for his sophistication, creativity and exuberance, David Rockwell is one of the leading architects, interiors architects and set designers working today. For over 30 years, he has explored his desire to imagine new worlds, to tell stories and to engage with others. This interest is rooted in his sense of play and possibility--an endless curiosity that continually drives him to ask, What if? What if you could step inside a crystal goblet? What if your environment transformed with every step? What if a restaurant could vanish at a moment's notice? What if your ultimate escapist fantasy was real? What If...' presents a wide array of Rockwell's brilliant explorations of the rich intersection between architecture and theater. Through immersive imagery and behind-the-scenes details, Rockwell introduces readers to 35 projects, from initial driving idea through physical realization. Works include the famed Nobu Fifty Seven and the newcomer TAO Downtown in New York, the W Paris Op ra, the West Lobby at The Cosmopolitan in Las Vegas and the newly opened TED Theater in Vancouver; set designs for the Academy Awards, Kinky Boots and Hairspray; the Hall of Fragments at the 2008 Venice Architecture Biennale and Jamie Oliver's traveling teaching kitchen, the Food Revolution truck. Engaging texts by Tony Award-winning playwright and screenplay writer John Guare, Tony Award-winning director and producer Jack O'Brien and Pulitzer Prize-winning critic Justin Davidson--written specially for this publication--and a conversation between Rockwell and acclaimed architect Elizabeth Diller round out this spectacular, celebratory volume. David Rockwell (born 1956) is an American architect and designer. He is founder and president of Rockwell Group, an award-winning, cross-disciplinary architecture and design practice based in New York City, with satellite offices in Madrid and Shanghai, that has been named as one of Fast Company's most innovative design practices.

Drawing Futures Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where

its future may lie. *Drawing Futures* focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

*Pierre Chareau* Esther Da Costa Meyer, 2024-05-14 Now back in print, a revealing look at the visionary French furniture designer and architect, highlighting his virtuoso designs and versatile creativity *Pierre Chareau: Modern Architecture and Design* adds even more depth and breadth to the architect's deserved reputation for creative virtuosity.--Julie V. Iovine, *Wall Street Journal* [A]n exceptionally informative, readable catalog.--Roberta Smith, *New York Times* The designer and architect Pierre Chareau (1883-1950) was a pivotal figure in modernism. His extraordinary Art Deco furniture is avidly collected and his visionary glass house, the *Maison de Verre*, is celebrated, but the breadth of his design genius has been little explored. Chareau linked architecture, fine arts, and style; designed furniture for avant-garde films and chic homes; collected artists such as Picasso and Mondrian; and was a radical innovator in the use of materials. This revealing look at the visionary French designer highlights his virtuosity and versatile creativity. Essays by leading scholars embrace the full scope of his invention, offering detailed analyses of individual projects, the interdisciplinary nature of his work, his Jewish background, his place in the avant-garde of Paris between the wars, and his more recent reception. Extensive illustrations present a rich sampling of Chareau's furniture, architecture, interiors, fabrics, and wallpapers, as well as his own important art collection. Published in association with the Jewish Museum, New York

**Prefab Architecture** Ryan E. Smith, 2011-06-03 *Prefab Architecture . . . is beyond theory, and beyond most of what we think we know about pods, containers, mods, and joints. This book is more than 'Prefabrication 101.'* It is the Joy of Cooking writ large for the architecture and construction industries. From the Foreword by James Timberlake, FAIA THE DEFINITIVE REFERENCE ON PREFAB ARCHITECTURE FOR ARCHITECTS AND CONSTRUCTION PROFESSIONALS Written for architects and related design and construction professionals, *Prefab Architecture* is a guide to off-site construction, presenting the opportunities and challenges associated with designing and building with components, panels, and modules. It presents the drawbacks of building in situ (on-site) and demonstrates why prefabrication is the smarter choice for better integration of products and processes, more efficient delivery, and realizing more value in project life cycles. In addition, *Prefab Architecture* provides: A selected history of prefabrication from the Industrial Revolution to current computer numerical control, and a theory of production from integrated processes to lean manufacturing Coverage on the tradeoffs of off-site fabrication including scope, schedule, and cost with the associated principles of labor, risk, and quality Up-to-date products featuring examples of prefabricated structure, enclosure, service, and interior building systems Documentation on

the constraints and execution of manufacturing, factory production, transportation, and assembly. Dozens of recent examples of prefab projects by contemporary architects and fabricators including KieranTimberlake, SHoP Architects, Office dA, Michelle Kaufmann, and many others. In *Prefab Architecture*, the fresh approaches toward creating buildings that accurately convey attitude and expanded green building methodologies make this book an important voice for adopting change in a construction industry entrenched in traditions of the past.

Design with Life Mitchell Joachim, Maria Aiolo, Terreform ONE, 2021-06-21 *Design with Life* chronicles the breakthroughs and projects of a nonprofit that is defining resolute new directions in socio-ecological design and other deep-seated intersections of synthetic biology, architecture, and urban systems. In the challenging context of accelerating climate dynamics, the core discipline of architectural design is evolving and embracing new forms of action. New York-based nonprofit Terreform ONE has established a distinctive design tactic that investigates projects through the regenerative use of natural materials, science, and the emergent field of socio-ecological design. This kind of design approach uses actual living matter (not abstracted imitations of nature) to create new functional elements and spaces. These future-based actions are not only grounded in social justice, but are also far-reaching in their application of digital manufacturing and maker culture. Terreform ONE tackles urgent environmental and urban social concerns through the integrated use of living materials and organisms.

A New Kind of Bleak: Journeys Through Urban Britain Owen Hatherley, 2012-07-31 An anatomy of failed-state Britain, by the author of *A Guide to the New Ruins of Great Britain*. In *A Guide to the New Ruins of Great Britain*, Owen Hatherley skewered New Labour's architectural legacy in all its witless swagger. Now, in the year of the Diamond Jubilee and the London Olympics, he sets out to describe what the Coalition's altogether different approach to economic mismanagement and civic irresponsibility is doing to the places where the British live. In a journey that begins and ends in the capital, Hatherley takes us from Plymouth and Brighton to Belfast and Aberdeen, by way of the eerie urbanism of the Welsh valleys and the much-mocked splendour of modernist Coventry. Everywhere outside the unreal Southeast, the building has stopped in towns and cities, which languish as they wait for the next bout of self-defeating austerity. Hatherley writes with unrivalled aggression about the disarray of modern Britain, and yet this remains a book about possibilities remembered, about unlikely successes in the midst of seemingly inexorable failure. For as well as trash, ancient and modern, Hatherley finds signs of the hopeful country Britain once was and hints of what it might become.

*Architecture Timed* Karen A. Franck, 2016-03-07 The traditional veneration of architecture for its monumental and enduring qualities seems to be changing. Architects and other designers are moving away from seeking permanence towards a more open, creative use of what time has to offer. This is revealed in new approaches to historic preservation, the proliferation of temporary structures, concerns regarding sustainability, and the employment of time-efficient processes.

Architecture Timed explores the role of ideas about time in the design inclinations and choices of contemporary designers of the environment. Contributors consider how the new can be incorporated into the old; how designing for the very short term has significant advantages; how what is temporary can be re-used; and how the design of materials, buildings and landscapes can improve sustainability and enhance experiences of time passing. Many designers have replaced the ideal of 'timelessness' and the view of time as a series of singular, static moments with an enriched and more nuanced perspective, treating time as a source of inspiration to be embraced, not a condition to be defended against. Contributors include: Juhani Pallasmaa, Brian McGrath, Federica Goffi, Jill Stoner, Richard Garber and Eric Parry. Designers featured include: Agence Ter, Shigeru Ban, BanG Studio, Diller Scofidio + Renfro, EMF Landscape Architects, Gluck+, GRO Architects, Interboro Partners, Toyo Ito, Kengo Kuma, Enric Miralles, Eric Parry Architects, Carlo Scarpa, Taylor Cullity Lethlean, UNStudio and Peter Zumthor.

**Studio Gang** Jeanne Gang, 2020-04-29 The most in-depth exploration of one of the most important, innovative, and creative architecture practices working today For the last twenty years Studio Gang, led by Jeanne Gang, has created buildings that, while spectacular, also deal with the most urgent problems of our time - inequality, climate change, and the challenges of urbanism. The studio's award-winning body of work spans multiple scales and typologies worldwide. This book showcases 25 exceptional projects - including the Aqua Tower and O'Hare International Airport in Chicago and Solar Carve Tower in New York City - that collectively demonstrate Studio Gang's bold, collaborative, research-based design approach.

They Told Me Not to Take that Job Reynold Levy, 2015-05-12 When Reynold Levy became the new president of Lincoln Center in 2002, New York Magazine described the situation he walked in to as a community in deep distress, riven by conflict. Ideas for the redevelopment of Lincoln Center's artistic facilities and public spaces required spending more than 1.2 billion, but there was no clear pathway for how to raise that kind of unprecedented sum. The individual resident organizations that were the key constituents of Lincoln Center -- the Metropolitan Opera, the New York City Opera, the New York Philharmonic, the Juilliard School, and eight others -- could not agree on a common capital plan or fundraising course of action. Instead, intramural rivalries and disputes filled the vacuum. Besides, some of those organizations had daunting problems of their own. Levy tells the inside story of the demise of the New York City Opera, the Metropolitan Opera's need to use as collateral its iconic Chagall tapestries in the face of mounting operating losses, and the New York Philharmonic's dalliance with Carnegie Hall. Yet despite these and other challenges, Levy and the extraordinary civic leaders at his side were able to shape a consensus for the physical modernization of the sixteen-acre campus and raise the money necessary to maintain Lincoln Center as the country's most vibrant performing arts destination. By the time he left, Lincoln Center had prepared itself fully for the next generation of artists and audiences. They Told Me Not to Take That Job is more than a memoir of life at the heart of one of the world's most prominent cultural institutions. It is also a case study of leadership and

management in action. How Levy and his colleagues triumphantly steered Lincoln Center -- through perhaps the most tumultuous decade of its history to a startling transformation -- is fully captured in his riveting account.

**Seventy-nine Short Essays on Design** Michael Bierut, 2012-03-20 *Seventy-nine Short Essays on Design* brings together the best of designer Michael Bierut's critical writing—serious or humorous, flattering or biting, but always on the mark. Bierut is widely considered the finest observer on design writing today. Covering topics as diverse as Twyla Tharp and ITC Garamond, Bierut's intelligent and accessible texts pull design culture into crisp focus. He touches on classics, like Massimo Vignelli and the cover of *The Catcher in the Rye*, as well as newcomers, like McSweeney's *Quarterly Concern* and color-coded terrorism alert levels. Along the way Nabakov's *Pale Fire*; Eero Saarinen; the paper clip; Celebration, Florida; the planet Saturn; the ClearRx pill bottle; and paper architecture all fall under his pen. His experience as a design practitioner informs his writing and gives it truth. In *Seventy-nine Short Essays on Design*, designers and nondesigners alike can share and revel in his insights.

**Writing About Architecture** Alexandra Lange, 2012-02-29 Extraordinary architecture addresses so much more than mere practical considerations. It inspires and provokes while creating a seamless experience of the physical world for its users. It is the rare writer that can frame the discussion of a building in a way that allows the reader to see it with new eyes. *Writing About Architecture* is a handbook on writing effectively and critically about buildings and cities. Each chapter opens with a reprint of a significant essay written by a renowned architecture critic, followed by a close reading and discussion of the writer's strategies. Lange offers her own analysis using contemporary examples as well as a checklist of questions at the end of each chapter to help guide the writer. This important addition to the *Architecture Briefs* series is based on the author's design writing courses at New York University and the School of Visual Arts. Lange also writes a popular online column for *Design Observer* and has written for *Dwell*, *Metropolis*, *New York* magazine, and *The New York Times*. *Writing About Architecture* includes analysis of critical writings by Ada Louise Huxtable, Lewis Mumford, Herbert Muschamp, Michael Sorkin, Charles Moore, Frederick Law Olmsted, and Jane Jacobs. Architects covered include Marcel Breuer, Diller Scofidio + Renfro, Field Operations, Norman Foster, Frank Gehry, Frederick Law Olmsted, SOM, Louis Sullivan, and Frank Lloyd Wright.

*Cartier and Islamic Art* Heather Ecker, Marton Radkai, 2022-04-12 A sumptuous exploration of the ways in which the Islamic arts have inspired the famous jewelry house Cartier, this book accompanies a major exhibition at the Musée des Arts Decoratifs, Paris, and the Dallas Museum of Art. Louis Cartier (1875-1942), the grandson of Cartier founder Louis-François, was an impassioned collector and patron of the arts. He was particularly entranced by Islamic arts, especially Persian book arts: their geometric shapes, color combinations, and motifs are apparent in Cartier jewelry to this day. Louis's younger brother Jacques—an expert in precious stones—traveled to India and the Persian Gulf in 1911 and 1912 to experience the

culture and bring home treasures of the Middle East: natural pearls. This was the pivotal moment when the dialogue between these two worlds opened up, eventually blossoming into a beautiful relationship that has lasted for decades. Published to accompany a major exhibition at the Musée des Arts Decoratifs in Paris and the Dallas Museum of Art, Cartier and Islamic Arts delves into the Cartier archives to trace the story of Louis Cartier's love of Islamic art and the ways in which he incorporated the Islamic world's stylized motifs into Cartier's jewelry. Dazzling photographs are accompanied by in-depth texts from a raft of distinguished scholars of both Islam and the decorative arts.

Gardens of the High Line Piet Oudolf, Rick Darke, 2017-06-14 "If you can't get to the High Line. . . this is the next best thing." —The Washington Post Before it was restored, the High Line was an untouched, abandoned landscape overgrown with wildflowers. Today it's a central plaza, a cultural center, a walkway, and a green retreat in a bustling city that is free for all to enjoy. This beautiful, dynamic garden was designed by Piet Oudolf, one of the world's most extraordinary garden designers. Gardens of the High Line, by Piet Oudolf and Rick Darke, offers an in-depth view into the planting designs, plant palette, and maintenance of this landmark achievement. It reveals a four-season garden that is filled with native and exotic plants, drought-tolerant perennials, and grasses that thrive and spread. It also offers inspiration and advice on recreating its iconic, naturalistic style. Featuring stunning photographs by Rick Darke and an introduction by Robert Hammond, the founder of the Friends of the High Line, this large-trim, photo-driven book is a must-have gem of nature of design.
