Alexandra Lange

Blur Elizabeth Diller, Ricardo Scofidio, 2002-09-03 The book, traces the creation, from conception to realization, of a media pavilion for the Swiss Expo.02 whose primary materials are steel and fog.

Site and Sound Victoria Newhouse, 2012-04-10 Victoria Newhouse, noted author and architectural historian, addresses the aesthetics and acoustics in concert halls and opera houses of the past, present, and future in this stunning companion to the highly regarded *Towards a New Museum*. *Site and Sound* explores the daunting, perennial question: Does the music serve the space, or the other way around? Heavily illustrated throughout—with historic images, spectacular color photographs, detailed drawings—this volume is an informed and enjoyable presentation of a building type that is at the heart of cities small and large. Newhouse starts with a survey of venues from ancient Greek and Roman times and progresses to contemporary works around the world. She singles out Lincoln Center in particular for its long history and its transitions and remodelings over the years. Two major chapters cover the present: one focuses on recent work in the West, including the National Opera House of Norway in Oslo by Snøhetta (2008), the Casa da Música in Porto, Portugal, by Rem Koolhaas (2005), and many more; the second examines the boom in concert halls in China. A final chapter looks at projects that are currently planned and the future of an architecture for music.

Flesh Elizabeth Diller, Ricardo Scofidio, 1996-01-01 Like all the work of architects Liz Diller + Ric Scofidio, *Flesh* is a set of contradictions and complexities. It is both a monograph of their work—the first ever on their art, architecture, and installations—but also not a traditional monograph. It is a both/and, neither/nor book-as-project noted at the time of its publication, in 1994, for its groundbreaking typography and not-too-subtle critique of architecture from within. Since its publication, Diller + Scofidio (now Diller Scofidio + Renfro) have gone on to become among the world's most famous architects, but the themes, concerns, and even forms that make them so celebrated today are all here in *Flesh*, along with its most radical proposition: that anything can be architecture, starting with this book, one of the most sought-after and valuable books in our library.

What If ...? Chee Pearlman, 2014 Widely admired for his sophistication, creativity and exuberance, David Rockwell is one

of the leading architects, interiors architects and set designers working today. For over 30 years, he has explored his desire to imagine new worlds, to tell stories and to engage with others. This interest is rooted in his sense of play and possibility--an endless curiosity that continually drives him to ask, What if? What if you could step inside a crystal goblet? What if your environment transformed with every step? What if a restaurant could vanish at a moment's notice? What if your ultimate escapist fantasy was real? What If...' presents a wide array of Rockwell's brilliant explorations of the rich intersection between architecture and theater. Through immersive imagery and behind-the-scenes details, Rockwell introduces readers to 35 projects, from initial driving idea through physical realization. Works include the famed Nobu Fifty Seven and the newcomer TAO Downtown in New York, the W Paris Opera, the West Lobby at The Cosmopolitan in Las Vegas and the newly opened TED Theater in Vancouver; set designs for the Academy Awards, Kinky Boots and Hairspray; the Hall of Fragments at the 2008 Venice Architecture Biennale and Jamie Oliver's traveling teaching kitchen, the Food Revolution truck. Engaging texts by Tony Award-winning playwright and screenplay writer John Guare, Tony Award-winning director and producer Jack O'Brien and Pulitzer Prize-winning critic Justin Davidson--written specially for this publication--and a conversation between Rockwell and acclaimed architect Elizabeth Diller round out this spectacular, celebratory volume. David Rockwell (born 1956) is an American architect and designer. He is founder and president of Rockwell Group, an award-winning, cross-disciplinary architecture and design practice based in New York City, with satellite offices in Madrid and Shanghai, that has been named as one of Fast Company's most innovative design practices.

The Language of Architecture Andrea Simitch, Val Warke, 2014-06-01
 DIV Learning a new discipline is similar to learning a new language; in order to master the foundation of architecture, you must first master the basic building blocks of its language—the definitions, function, and usage. Language of Architecture provides students and professional architects with the basic elements of architectural design, divided into twenty-six easy-to-comprehend chapters. This visual reference includes an introductory, historical view of the elements, as well as an overview of how these elements can and have been used across multiple design disciplines.
 DIV Whether you're new to the field or have been an architect for years, you'll want to flip through the pages of this book throughout your career and use it as the go-to reference for inspiration, ideas, and reminders of how a strong knowledge of the basics allows for meaningful, memorable, and beautiful fashions that extend beyond trends.
 DIV This comprehensive learning tool is the one book you'll want as a staple in your library.

Lincoln Center Inside Out Diller Scofidio + Renfro, Elizabeth Diller, Ricardo Scofidio, 2012 The redesign of Lincoln Center is one of the most challenging and innovative civic projects in recent urban history. Over the past eight years Diller Scofidio + Renfro, in close collaboration with Lincoln Center's leadership, has transformed the fifty year old Modernist

citadel into a porous and democratic campus. This visually rich document is the first comprehensive book to feature the extensive redevelopment in its entirety. Through a combination of photographs, drawings, renderings, archival records and texts, the book describes the innovative strategies that have dissolved the public/private divide and effectively turned the campus inside-out, extending the spectacle of the performance halls into the Center's mute public spaces and surrounding streets. Conceived as a cross between an art book, a scholarly record, and an architectural diary this publication demonstrates how the recent redesign both respects and challenges preconceived notions about Lincoln Center and its ongoing role as a cultural hub in an ever-changing city. This unorthodox publication is comprised entirely of gatefolds; a series of inside-out centerfolds where the exterior pages of each spread feature glossy, large-format, full-bleed photographs highlighting different parts of the campus. Inside the gatefolds, tucked behind these lush photos, is a series of back stories that reveal the surprising evolution and unexpected afterlife of the same spaces.

The High Line James Corner Field Operations, Diller Scofidio & Renfro, 2015-11-09 The first-hand, behind-the-scenes account of the creative inspiration behind the High Line, the transformative public 'park in the sky' that has reshaped global perceptions of urban space - and become one of the most beloved and visited destinations in New York City. The first full documentation that visually charts the journey of this global landmark from the designer's point of view. Hundreds of illustrations showcase every aspect of the project and its unforeseen influence in its entirety. Includes previously unpublished archival materials such as the drawings behind the original proposal and exclusive images of construction. The book mirrors the architecture and composition of the park through its large landscape format with foldouts, surprising packaging and inserts. More than a visual masterpiece - its seven chapters are well-organized, legible, comprehensive and accessible. Detailed, obsessive, quirky, compelling, and beautiful, the book captures the essence of the High Line. THE book for design enthusiasts including architects, landscape designers and urban planners - as well as for general-interest lovers of New York City, culture, art, gardens, and city life.

Prefab Architecture Ryan E. Smith, 2010-12-14 Prefab Architecture . . . is beyond theory, and beyond most of what we think we know about pods, containers, mods, and joints. This book is more than 'Prefabrication 101.' It is the Joy of Cooking writ large for the architecture and construction industries. From the Foreword by James Timberlake, FAIA THE DEFINITIVE REFERENCE ON PREFAB ARCHITECTURE FOR ARCHITECTS AND CONSTRUCTION PROFESSIONALS Written for architects and related design and construction professionals, Prefab Architecture is a guide to off-site construction, presenting the opportunities and challenges associated with designing and building with components, panels, and modules. It presents the drawbacks of building in situ (on-site) and demonstrates why prefabrication is the smarter choice for better integration of products and processes, more efficient delivery, and realizing more value in project life cycles. In addition, Prefab Architecture provides: A selected history of prefabrication from the Industrial Revolution to current computer

numerical control, and a theory of production from integrated processes to lean manufacturing Coverage on the tradeoffs of off-site fabrication including scope, schedule, and cost with the associated principles of labor, risk, and quality Up-to-date products featuring examples of prefabricated structure, enclosure, service, and interior building systems Documentation on the constraints and execution of manufacturing, factory production, transportation, and assembly Dozens of recent examples of prefab projects by contemporary architects and fabricators including KieranTimberlake, SHoP Architects, Office dA, Michelle Kaufmann, and many others In Prefab Architecture, the fresh approaches toward creating buildings that accurately convey attitude and expanded green building methodologies make this book an important voice for adopting change in a construction industry entrenched in traditions of the past.

Design with Life Mitchell Joachim, Maria Aiolo, Terreform ONE, 2021-06-21 Design with Life chronicles the breakthroughs and projects of a nonprofit that is defining resolute new directions in socio-ecological design and other deep-seated intersections of synthetic biology, architecture, and urban systems. In the challenging context of accelerating climate dynamics, the core discipline of architectural design is evolving and embracing new forms of action. New York-based nonprofit Terreform ONE has established a distinctive design tactic that investigates projects through the regenerative use of natural materials, science, and the emergent field of socio-ecological design. This kind of design approach uses actual living matter (not abstracted imitations of nature) to create new functional elements and spaces. These future-based actions are not only grounded in social justice, but are also far-reaching in their application of digital manufacturing and maker culture. Terreform ONE tackles urgent environmental and urban social concerns through the integrated use of living materials and organisms.

Architecture Timed Karen A. Franck, 2016-03-07 The traditional veneration of architecture for its monumental and enduring qualities seems to be changing. Architects and other designers are moving away from seeking permanence towards a more open, creative use of what time has to offer. This is revealed in new approaches to historic preservation, the proliferation of temporary structures, concerns regarding sustainability, and the employment of time-efficient processes. Architecture Timed explores the role of ideas about time in the design inclinations and choices of contemporary designers of the environment. Contributors consider how the new can be incorporated into the old; how designing for the very short term has significant advantages; how what is temporary can be re-used; and how the design of materials, buildings and landscapes can improve sustainability and enhance experiences of time passing. Many designers have replaced the ideal of 'timelessness' and the view of time as a series of singular, static moments with an enriched and more nuanced perspective, treating time as a source of inspiration to be embraced, not a condition to be defended against. Contributors include: Juhani Pallasmaa, Brian McGrath, Federica Goffi, Jill Stoner, Richard Garber and Eric Parry. Designers featured include: Agence Ter, Shigeru Ban, BanG Studio, Diller Scofidio + Renfro, EMF Landscape Architects, Gluck+, GRO Architects, Interboro

Partners, Toyo Ito, Kengo Kuma, Enric Miralles, Eric Parry Architects, Carlo Scarpa, Taylor Cullity Lethlean, UNStudio and Peter Zumthor.

Drawing Futures Laura Allen, Luke Caspar Pearson, 2016 This compendium of projects, writings and interviews focuses on how the field of drawing expands synchronously alongside technological and computational developments. This book critically reassesses the act of drawing and where its future may lie. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas. Drawings seduce, and the drawings in this book are tantalising evidence of this. Yet the aim of the book is to illustrate how drawing works as an abundantly rich, diverse, inventive, critical and serious research domain. In this regard, it is a study of the point and promise of drawing; which both explores the microscopic detail of the craft and envisions the radical possibilities inherent in its expression. The academics, artists and architects whose work lies within conceive of drawing as a rigorous, liberating form of expression.

Writing About Architecture Alexandra Lange, 2012-02-29 Extraordinary architecture addresses so much more than mere practical considerations. It inspires and provokes while creating a seamless experience of the physical world for its users. It is the rare writer that can frame the discussion of a building in a way that allows the reader to see it with new eyes. *Writing About Architecture* is a handbook on writing effectively and critically about buildings and cities. Each chapter opens with a reprint of a significant essay written by a renowned architecture critic, followed by a close reading and discussion of the writer's strategies. Lange offers her own analysis using contemporary examples as well as a checklist of questions at the end of each chapter to help guide the writer. This important addition to the *Architecture Briefs* series is based on the author's design writing courses at New York University and the School of Visual Arts. Lange also writes a popular online column for *Design Observer* and has written for *Dwell*, *Metropolis*, *New York magazine*, and *The New York Times*. *Writing About Architecture* includes analysis of critical writings by Ada Louise Huxtable, Lewis Mumford, Herbert Muschamp, Michael Sorkin, Charles Moore, Frederick Law Olmsted, and Jane Jacobs. Architects covered include Marcel Breuer, Diller Scofidio + Renfro, Field Operations, Norman Foster, Frank Gehry, Frederick Law Olmsted, SOM, Louis Sullivan, and Frank Lloyd Wright.

79 Short Essays on Design Michael Bierut, 2007-05-31 Collects some of designer Michael Bierut's best essays on design, covering such topics as color-coded terrorism alerts, the cover of *Catcher in the Rye*, the planet Saturn, and the town of Celebration, Florida.

Gardens of the High Line Piet Oudolf, Rick Darke, 2017-06-14 "If you can't get to the High Line. . . this is the next best thing." —The Washington Post Before it was restored, the High Line was an untouched, abandoned landscape overgrown with wildflowers. Today it's a central plaza, a cultural center, a walkway, and a green retreat in a bustling city that is free for

all to enjoy. This beautiful, dynamic garden was designed by Piet Oudolf, one of the world's most extraordinary garden designers. *Gardens of the High Line*, by Piet Oudolf and Rick Darke, offers an in-depth view into the planting designs, plant palette, and maintenance of this landmark achievement. It reveals a four-season garden that is filled with native and exotic plants, drought-tolerant perennials, and grasses that thrive and spread. It also offers inspiration and advice on recreating its iconic, naturalistic style. Featuring stunning photographs by Rick Darke and an introduction by Robert Hammond, the founder of the Friends of the High Line, this large-trim, photo-driven book is a must-have gem of nature of design.

Diller Scofidio + Renfro Edward Dimendberg, 2013-03-20 In *Diller Scofidio + Renfro: Architecture after Images*, Edward Dimendberg offers the first comprehensive treatment of one of the most imaginative contemporary design studios. Since founding their practice in 1979, Elizabeth Diller and Ricardo Scofidio have integrated architecture, urban design, media art, and the performing arts in a dazzling array of projects, which include performances, art installations, and books, in addition to buildings and public spaces. At the center of this work is a fascination with vision and a commitment to questioning the certainty and security long associated with architecture. Dimendberg provides an extensive overview of these concerns and the history of the studio, revealing how principals Elizabeth Diller, Ricardo Scofidio, and Charles Renfro continue to expand the definition of architecture, question the nature of space and vision in contemporary culture, and produce work that is endlessly surprising and rewarding, from New York's High Line to *Blur*, an artificial cloud, and *Facsimile*, a video screen that moves around a building facade. Dimendberg also explores the relation of work by DS+R to that by earlier modernists such as Marcel Duchamp and John Hejduk. He reveals how the fascination of the architects with evolving forms of media, technology, and building materials has produced works that unsettle distinctions among architecture and other media. Based on interviews with the architects, their clients, and collaborators as well as unprecedented access to unpublished documents, sketchbook entries, and archival records, *Diller Scofidio + Renfro* is the most thorough consideration of DS+R in any language. Illustrated with many previously unpublished renderings in addition to photos from significant contemporary photographers, this book is an essential study of one of the most significant and creative architecture and design studios working today.

Rescuing Eden, 2015-10-06 From simple 18th- and early 19th-century gardens to the lavish estates of the Gilded Age, the gardens started by 1930s inmates at Alcatraz in San Francisco Bay to the centuries-old camellias at Middleton Place near Charleston, South Carolina—*Rescuing Eden* celebrates the history of garden design in the United States, with 28 examples that have been saved by ardent conservationists and generous private owners, and opened to the public. The United States has a rich tradition of landscape design, with gardens on a scale that rivaled the great gardens of Europe, but in the absence of specific institutions dedicated to their preservation, many of these “ephemeral collaborations between man and nature” were lost—during the wars, economic depressions, and social upheavals that swept the country in the mid-20th-century, or to

creeping development and urban sprawl. The surviving gardens presented here were selected for the drama of their original creation and rescue and for their historical and horticultural importance. Ranging from wonderful to woebegone, each has its own character, and each has been brought back from the brink through a combination of imagination and tenacity. Discover The Kampong in Miami, Florida, planted with hundreds of tropical rarities from Southeast Asia by legendary plant explorer Dr. David Fairchild; Barnsley Gardens in Georgia, one of the few antebellum gardens surviving in the South, planted with 200 varieties of roses; the Lynchburg, Virginia garden created by Harlem Renaissance poet and civil rights activist Anne Spencer; the eccentric Ladew Topiary Gardens, with 15 garden rooms and a topiary foxhunt; the Belle Epoque grandeur of the Untermyer Garden in Yonkers, New York; and many others across the country, in Kentucky, Texas, Michigan, Maine, Rhode Island, and California. Each garden has been specially photographed by noted landscape and garden photographer Curtice Taylor, and introduced with authoritative and engaging text from design historian Caroline Seeböhm, encouraging readers to appreciate the landscapes that serve not only as windows on American history, but living, flourishing pleasure grounds for botanists, horticulturalists, and nature lovers throughout the United States.

The Green House Alanna Stang, Christopher Hawthorne, 2005-06-02 From the arid deserts of Tucson, Arizona to the icy forests of Poori, Finland to the tropical beaches of New South Wales, Australia to the urban jungle of downtown Manhattan, critics Alanna Stang and Christopher Hawthorne have travelled to the farthest reaches of the globe to find all that is new in the design of sustainable, or green homes. The result is more than thirty-five residences in fifteen countries, and nearly every conceivable natural environment, designed by a combination of star architects and heretofore unknown practitioners including Santiago Calatrava, Shigeru Ban, Miller/Hull, Rick Joy, Lake Flato, Kengo Kuma, Glenn Murcutt, Pugh & Scarpa, Werner Sobek, and many others. Projects are presented with large colour images, plans, drawings, and an accompanying text that describes their green features and explains how they work with and in the environment. The Green House is not only a beautiful object in its own right, but is sure to be an indispensable reference for anyone building or interested in sustainable design.

Studio Gang Jeanne Gang, 2020-04-29 The most in-depth exploration of one of the most important, innovative, and creative architecture practices working today For the last twenty years Studio Gang, led by Jeanne Gang, has created buildings that, while spectacular, also deal with the most urgent problems of our time - inequality, climate change, and the challenges of urbanism. The studio's award-winning body of work spans multiple scales and typologies worldwide. This book showcases 25 exceptional projects - including the Aqua Tower and O'Hare International Airport in Chicago and Solar Carve Tower in New York City - that collectively demonstrate Studio Gang's bold, collaborative, research-based design approach.

Architecture Unbound Joseph Giovannini, 2021-11-30 Examines the influence of twentieth-century avant-garde movements on the contemporary architectural landscape through the work of "disruptors" such as Frank Gehry, Rem

Koolhaas, and Zaha Hadid. With an irregular format designed by celebrated graphic designer Abbott Miller of Pentagram. In *Architecture Unbound*, noted architecture critic Joseph Giovannini proposes that our current architectural landscape ultimately emerged from transgressive and progressive art movements that had roiled Europe before and after World War I. By the 1960s, social unrest and cultural disruption opened the way for investigations into an inventive, antiauthoritarian architecture. Explorations emerged in the 1970s, and built projects surfaced in the 1980s, taking digital form in the 1990s, with large-scale projects finally landing on the far side of the millennium. *Architecture Unbound* traces all of these developments and influences, presenting an authoritative and illuminating history not only of the sources of contemporary currents in architecture but also of the twentieth-century avant-garde and the twenty-first-century digital revolution in form-making, and profiling the most influential practitioners and their most notable projects, including Frank Gehry's Guggenheim Bilbao and Walt Disney Concert Hall, Zaha Hadid's Guangzhou Opera House, Daniel Libeskind's master plan for the World Trade Center, Rem Koolhaas's CCTV Tower, and Herzog and de Meuron's Bird's Nest Olympic Stadium in Beijing.
