Environmental Anthropology Today

Dishes that are fun to cook, beautiful to look at, a pleasure to share, and kind to the body. And, importantly, that pay homage to the sunny Riviera di Levante

The migration movements of the 20th century have led to an increased interest in similarly dramatic population changes in the preceding century. The contributors to this volume - legal scholars, sociologists, political scientists and historians - focus on migration control in the 19th century, concentrating on three areas in particular:

1. The multi-faceted issue of African liberation. The key themes of the book explore ways of improving the effectiveness of the African Union, fostering unity amongst African countries through environmental protection, and building ownership of the African Union by the African people and their communities. In addition, the book

Forcibly Displaced

The Oxford Handbook of Refugee and Forced Migration Studies

Forcibly Displaced
Today, we face some of the greatest environmental challenges in global history. Understanding the damage being done and the varied ethics and efforts contributing to its effects is crucial. This volume provides an environmental analysis of the social science of its problems and the theoretical and methodological tools of anthropological practice, to aid conservation efforts, policy initiatives, and our overall understanding of the environment as citizens of the planet.

Anthropology Today combines a range of new ethnographic work with chapters exploring key theoretical and methodological issues, and draws on disciplines such as sociology and environmental science as well as anthropology to illuminate these issues. The case studies include work on North America, Europe, India, Africa, Asia, and South America, offering the reader a stimulating and thoughtful survey of the work currently being conducted in the field.

A Companion to the Anthropology of Europe

This book calls for re-conceptualizing urban recovery by exploring the intersection of reconstruction and displacement as volatile contexts in the Global South. It explores the spatial, social, artistic, and political conditions that promote urban recovery. Reconstruction and displacement have often been studied independently as two different processes of physical recovery and human migration towards safety and shelter. It is hoped that by intersecting or even bridging reconstruction with displacement, we might come closer to understanding the notion of urban recovery as a holistic and multi-layered concept.

The Handbook of Contemporary Cambodia

Whereas most of the literature on migration focuses on individuals and their families, this book studies the organization created by immigrants to protect themselves in their receiving states. Comparing eighteen of these grassroots organizations formed across the world, from Fiji to Colombia to Vietnam to the Congo, researchers from the United States, Belgium, France, the Netherlands, and Spain draw on their studies of the internal structure and activities of these organizations as they relate to developmental initiatives. The book outlines the principal positions in the migration and development debate and discusses the concept of transnationalism as a means of resolving these controversies.

Masses in Flight

This book explores the issue of development-induced resettlement, with a particular emphasis on the humanitarian, legal, and social aspects of this problem. Today, so-called "development-induced displacement and resettlement" (DIDR) is one of the dominant causes of internal spatial mobility worldwide. Each year over 15 million people are displaced due to a lack of prospects to make specific development projects possible. But the costs of displacement are high: lost property, communication networks, urbanization and re-urbanization, the extraction and transportation of mineral resources, forced evictions in urban areas, and population relocation without adequate compensation and autonomy. Development-induced displacement is a human rights issue occurring in all regions of the world. As a human rights issue it poses a challenge to public international law and to institutions providing humanitarian assistance. A significant part of this book is devoted to the current dynamics of development-caused resettlement in Europe, which has been neglected in the academic literature so far.

Grounded in multi-disciplinary grounded research, this book presents a methodological understanding of those displaced within their national borders, the Internally Displaced Persons (IDPs). The IDP phenomenon remains less understood than that of refugees due to the "internal" nature of the crisis, linked to a nation's sovereignty, which assigns the responsibility for solving the problem to the national government. The book presents a multi-disciplinary and multi-institutional challenge, with upwards of 40 million people currently in internal displacement across the globe. This book helps answer the most perplexing questions surrounding conflict-induced protracted displacement and the politics of internal displacement, by key scholars from around the world. The book focuses on two questions: first, how do families remain resistant to return to home communities and equally reluctant to embrace new host communities? Capitalizing on the diagnostic tool kit known as Dugan's Masses in Flight, uniquely adapted to the Asmat Hiriad displacement, this book also analyses issues of the differently displaced communities of Bagarara-Barahasa, Adbalna and South Caserta, Kosovan and Darfur regions. This book will be of much interest to students of peace and conflict studies, humanitarianism, Asian politics, and international law in general.

Armed Conflict and Forcible Displacement

This volume foregrounds the dynamics of displacement and the experiences of internal refugees uprooted by conflict and violence in Indonesia. Contributors examine internal displacement in the context of militarized conflict and violence in East Timor, Aceh, and Papua, and in other parts of Outer Island Indonesia during the transition from authoritarian rule. The volume also explores official and humanitarian discourses on displacement and their significance for the politics of representation.

Places of Pain

A collection of oral histories that reveal the loss of cultural continuity, identity, shifts in family responsibilities, gender roles and fractured relationships between generations that are just some of the challenges people face as they attempt to rebuild lives and communities.

Incorporating the Guiding Principles on Internal Displacement into Domestic Law

Durante el curso 20052006 se inicia en el primer año de Administración y Dirección de Empresas en la Universidad Pontificia Comillas de Madrid el proyecto Piloto de implantación de nuevas estructuras y metodologías académicas con el Espacio Europeo de Educación Superior. El contenido de este libro refleja los resultados obtenidos en un proyecto de investigación acerca de la formación centrada en el alumno en Turquía, Bélgica, Francia, los Países Bajos y España, y el análisis de la aplicación del Espacio Europeo de Educación Superior (EHESS) en el que se pretende valorar si las estrategias utilizadas por el equipo de docentes de esta titulación eran eficaces; si las estrategias adoptadas; si los estudiantes llegaban a las enseñanzas; y si los estudiantes aprenden, sus niveles de autorregulación y de autoeficacia académica y si están satisfechos con las metodologías de aprendizaje y de evaluación utilizadas, así como el nivel de asistencia percibido en algunas competencias profesionales. También se describen cómo perciben los cambios en las metodologías y estructura de la docencia los profesores de la titulación.

The Handbook of Displacement

This series reflects the multi-disciplinary nature of the field and includes within its scope international law, anthropology, medicine, geopolitics, social psychology and economics.

Breaking the Impasse

The massive dimensions of Syria's refugee crisis-and the search for solutions The civil war in Syria has forced some 10 million people-roughly half the country's population-from their homes and communities, creating one of the largest human displacements since the end of World War II. Daily headlines testify to their plight, both within Syria and to the countries to which they have fled. The Consequences of Chaos looks beyond the ever-increasing numbers of Syria's uprooted to consider the long-term economic, political, and social implications of this massive movement of people. Neighboring countries hosting thousands or even millions of refugees, Western governments called upon to provide financial assistance and even new homes for the refugees, regional and international organizations struggling to cope with the demands, and the United States have all confronted the challenges. And the challenges of finding solutions to this displacement are likely to continue for years, perhaps even for decades. The Syrian displacement crisis raises fundamental questions about the relationship between action to prevent crisis and the provision of humanitarian assistance and development in the wake of such crises. The increasingly protracted nature of the crisis also raises the need for the international community to think beyond just relief assistance and adopt development projects that help refugees become productive members of their host communities.

The African Union Ten Years After

Now are refuge crises solved? This has become an urgent question as global displacement rates continue to climb, and refugee situations now persist for years if not decades. The resolution of displacement and the conflicts that force refugees from their homes is often explained as a top-down process led and controlled by governments and international organizations. This book takes a different approach. Through contributions from scholars working in politics, anthropology, law, sociology and political science, the book presents itself as a collection of case studies that themselves interrogate the dynamics of displacement and resettlement. It investigates the empirical and normative significance of refugees' engagement as agents in these processes, and their implications for research, policy and practice.

Migrants Forewarn

The twelfth edition of the EFA Global Monitoring Report marking the 2015 deadline for the six goals set at the World Education Forum in Dakar, Senegal, in 2000 provides a considered and comprehensive accounting of global progress. As the international community prepares for a new development and education agenda, this report takes a critical look at recent education gains and sets out a range of future challenges. There are many signs of notable advance. The pace of universal primary education has quickened, gender disparity has been reduced in many countries and governments are increasing their focus on making sure children receive an education of good quality. However, despite these efforts, the world failed to meet its overall commitment to Education for All. Millions of children and adolescents are still out of school, and it is the poorest and most disadvantaged who bear the brunt of this failure to reach the EFA targets.

Eudcation For All 2000-2015: Achievements and challenges

The Syrian refugee crisis has galvanized attention to one of the world’s most challenging forced displacement. The total number of refugees and internally displaced
The Migration-Displacement Nexus

Displacements in the Asia Pacific region are escalating. The region has for decades experienced more than half of the world’s natural disasters and, in recent years, a disproportionately high share of extreme weather-related disasters, which displaced 13 million people in 2013 alone. This volume offers an innovative and thought-provoking perspective on an immediate and complex problem: how to deal with people fleeing violence, humanitarian crises, and natural disasters. T

Internal Displacement and Conflict

Refugee and Forced Migration Studies has grown from being a relatively small number of scholars and policy researchers in the 1980s to a global field of interest with thousands of students worldwide studying displacement either from traditional disciplinary perspectives or as a core component of newer programs across the humanities and social and political sciences. Today the field encompasses an enormous academic research which may or may not ultimately inform policy and practice, as well as as research-focused on advocating in favor of refugees’ needs and rights. This authoritative handbook critically evaluates the birth and development of refugee and forced migration studies, and analyses the key contemporary and future challenges faced by academics and practitioners working with and for forcibly displaced populations around the world. The 32 state-of-the-art chapters, written by leading academics, practitioners, and policymakers working in universities, research centres, think tanks, NGOs and international organizations, provide a comprehensive and cutting-edge overview of the key intellectual, political, social, and economic challenges arising from mass displacement in the world today. The chapters vividly illustrate the vibrant and engaging debates that characterize this rapidly expanding field of research and practice.

National Protection of Internally Displaced Persons in Africa

The global number of internally displaced persons (IDPs) has reached an all-time high, as an increasing number of IDPs remain displaced for years or even decades. Tens of millions of IDPs are dependent on humanitarian assistance or live far below the poverty line in substandard housing without security of tenure, and with no or only limited access to basic services, education and health care. With durable solutions out of reach and facing barriers to leading self-sufficient lives, they are "virtually invisible" to the international or even the national human rights institutions. The Handbook provides an overview of the situation of IDPs around the world and highlights the important role that the United Nations can play in advocating for the protection of IDPs. It includes chapters by leading academics and practitioners, as well as by international organizations such as the United Nations High Commissioner for Refugees (UNHCR) and the African Union (AU).

Development-Induced Displacement and Resettlement

In 2013, the World Bank’s Development-Induced Displacement Network released a flagship report entitled “People, Displacement and Development,” which set out to assess the impact of development-induced displacement on economic development and development outcomes, as well as to highlight the need for better measurement and policy responses. The report identified three key areas where policy and practice can be improved: first, it stresses the need for better measurement and monitoring of development-induced displacement; second, it highlights the importance of understanding the dynamics of displacement, including the factors that lead to displacement; and third, it stresses the importance of designing and implementing policies and programs that can help mitigate the impacts of displacement.

Protecting the Internally Displaced

The past 25 years have seen a major paradigm shift in the field of violence prevention, from the assumption that violence is inevitable to the recognition that violence is preventable. This shift has occurred in response to changing perceptions about violence prevention. In exploring the evidence base, researchers have recognized the tendency for violent acts to cluster, to spread from place to place, and to mutate from one type to another. Furthermore, violent acts are not only the outcomes of violent acts; they are also the causes of other acts. The ongoing process of violence has also been studied, revealing that violence is not a static condition but rather a dynamic process that can be affected by changes in the environment or by individual actions. As a result, the concept of violence has expanded to include not only violent acts but also the factors and conditions that promote or prevent them.

Migration Control in the North Atlantic World

Recasting the Migration Regime

For displaced persons, memory and identity is performed, (re)constructed and (re)negotiated daily. Forced displacement radically reshapes identity, with results ranging from political repression to feelings of permanent displacement. This compelling volume describes the process of forgetting and the ways in which displacement has impacted individuals and communities. It explores the complex relationships between displacement and identity, and examines the role of memory and identity in shaping the experiences of displaced persons. The book provides a comprehensive overview of the impact of displacement on memory and identity, and offers insights into the ways in which these concepts can be used to understand the experiences of displaced populations.

Urban Recovery

The war in Syria, now in its eighth year, continues to take its toll on the Syrian people. More than half of the population of Syria remains displaced. 5.6 million people live outside of Syria’s borders and another 6.2 million are internally displaced. 75% of the 12 million school-age children of these, less than half attend school. Another 739,000 Syrian children are out of school in the five neighboring countries that host Syria’s refugees. The loss of human capital is staggering, and it will create permanent hardships for generations of Syrians going forward. Despite the tragic prospects for Syria, there is some hope that the Syrian government and its international partners may be able to work together to address some of the root causes of the conflict. It is critical that the international community work together in a coordinated and effective manner to provide assistance to those in need and to support the efforts of the Syrian government and its international partners to promote a peaceful and lasting resolution to the conflict.
This wide-ranging collection examines the relationship among Islam, civil society, and the state. The contributors—including both Muslims and non-Muslims—investigate how radical Islamists can be distinguished from moderate Muslims, analyze the potential for moderate Islamic governance, and challenge monolithic conceptions of Islam.

Global Implications of Development, Disasters and Climate Change

There is growing political concern about the increasing numbers of people displaced both within the borders of their countries and internationally. This volume explores the interrelated threats of contemporary global displacement with a particular focus on low-level conflict, climatic and environmental change and infrastructure development. The authors examine the governance of global displacement assessing the protection needs and responses of national governments and the international community. It further considers options for improving the humanitarian and political management of this growing problem.

Return to Violent Conflict? Challenges of Sustainable Return of Refugees and Internally Displaced Persons to and Within South Sudan

Emerging and developing countries have grown faster than advanced countries since the 2000s. This shifting weight of global economic activity from “the west” to “East and South” is referred to as “shifting wealth”. But in recent years, a number of factors, such as lower commodity prices, seek

Children and Youth on the Front Line

This volume examines the protection of internally displaced persons (IDPs) through an interdisciplinary lens, with a focus on IDPs in Africa. The novelty of this book resonates from the fact that it explores national perspectives on internal displacement, with the aim of providing a well-grounded engagement on the subject of internal displacement, for which very little exists. The chapter authors are drawn from various disciplines and institutional backgrounds, and provide context-based analysis and examine the situation in countries with significant population displacement. The work is a timely engagement, as the issue of internal displacement has emerged as a pertinent concern in Africa. Each of the chapters in this book draw on significant context-based knowledge and on issues for which there is a need for pertinent attention across the African countries. This book will be a significant reference point for researchers, professors, practitioners, judges, policy makers, international organizations, regional bodies, lawyers and scholars in the field of migration, forced migration, and regional institutions.

The Mobility of Displaced Syrians

Annotation This title analyses the multi-faceted nature of impoverishment and vulnerability which emerges from long periods of conflict-induced displacement. It reviews the situation of displaced in the context of a wide range of measures of vulnerability including material well being, employment, shelter, human and social capital and concludes that significant vulnerability remains even after many years of displacement.

The State and the Grassroots

A Companion to the Anthropology of Europe offers a survey of contemporary Europeanist anthropology and European ethnology, and a guide to emerging trends in this geographical field of research. Providing a synthesis of the different traditions and contemporary approaches, the book is both thematic and fully cross-European in its approach. Provides an authoritative guide for researchers, instructors and students of anthropology and European studies Discusses important emerging trends in this broadening field of research Includes established names and rising stars who will shape the discipline in years to come

Contagion of Violence

This book addresses the involuntary and arbitrary displacement of individuals resulting from armed conflict and gross human rights violations. It shows that forcible displacement constitutes a serious violation of international law and of fundamental community interests. Armed Conflict and Forcible Displacement provides a critical legal analysis of the contemporary international framework, permeating forcible displacement in these circumstances and explores the rights that individuals possess with specific focus on the right not to be displaced and, where this fails, the right to return home and to receive property restitution. In doing so, this volume marries together different fields of international law and builds on the case studies of Cyprus, Colombia, Cambodia and Syria. While the case studies considered here are far from exhaustive, they are either little explored or present significant challenges due to the magnitude of displacement or contested international jurisprudence. Through this analysis, the volume exposes some of the legal challenges that individuals encounter in being protected from forcible displacement, as well as the legal obstacles that persist in ensuring the return of and the recovery of property by the displaced. It will be of interest to those interested in the fields of international law, human rights law, as well as conflict and war studies.
