

Le Corbusier Precisiones

Mauricio Pinilla Acevedo

Le Corbusier Kenneth Frampton, 2001-01-16 Panorámico estudio que recoge en la medida de lo posible el itinerario físico e intelectual y la evolución artística de Le Corbusier señalándole como uno de los arquitectos más influyentes de nuestro siglo.

Le Corbusier's Maison Curutchet Alejandro Lapunzina, 1997 One of his very few built projects in the Americas, Maison Curutchet is a fascinating representation of Le Corbusier's stylistic transitional period, bridging his late 1920s purism and the maturity of his later work in India. Like Casa Malaparte, this book offers an in-depth analysis of a single building through original documents, drawings, and photographs.

Arquitectura y género Mónica Cevedio, 2003 Esta investigación trata de ser una reflexión crítica sobre la concepción androcéntrica dominante en la Historia de la Arquitectura Occidental. Para ello he querido manifestar el vínculo entre arquitectura, género y política; entrelazándolos para analizar la idea de espacio. Se trata de repensar el espacio bajo una nueva mirada, la del género, es decir, a través de las diferencias culturales entre hombres y mujeres, ya que como sexo se entiende las diferencias biológicas. Este libro trata de ir contra la pasividad y el silencio impuestos a las mujeres, procurando así destruir “ideológicamente” el lugar y espacio que éstas ocupan, lugar impuesto con un proceso ideológico, transmitido por los hombres a la humanidad, a través de la cultura, el arte y la arquitectura, entre otras manifestaciones. Si bien el espacio no tiene sexo, su valoración se hace a través de quien hace uso de él; el espacio no es neutral y denota quién y cómo lo ocupa, además de estar relacionado con el poder económico, cultural y social. Mónica Cebedio es arquitecta por la facultad de Arquitectura y Urbanismo de la Universidad Nacional de la Plata, y doctora por la Universidad Politécnica de Cataluña.

Le Corbusier, Sert y Wiener Doris Tarchópulos, 2022-03-31 Este libro reivindica las figuras de Le Corbusier, Josep Lluís Sert y Paul Lester Wiener en los planes de construcción de la ciudad de Bogotá. El impacto que tuvieron estos arquitectos en el desarrollo y en la implantación de paradigmas sociales y urbanísticos de la ciudad no es menor, a pesar de lo que se ha creído en la academia del país. Acompañado de un rico material gráfico, este libro plantea un detallado análisis del panorama histórico de dos episodios especialmente significativos en la construcción de ciudad y en las ideas de desarrollo derivadas de esta: los planes Piloto y Regulador (1949-1953). Estos proyectos delimitaron la zonificación urbana en Bogotá, el sistema vial, los regímenes de construcción, la planificación de la vivienda pública, entre otros elementos. Así, el lector encontrará en este

libro cuidadosamente editado una amplia documentación de estos planes urbanos, que se recupera con un serio trabajo de archivo y con la búsqueda rigurosa de Doris Tarchópulos.

Semiótica narrativa del espacio arquitectónico Bruno Chuk, 2005

El sentido de la arquitectura moderna Helio Piñón, 1998 Rastrear la genealogía de la idea moderna de forma a lo largo de la estética del siglo XIX y analizar el proceso de su desarrollo en la arquitectura del siglo XX es el propósito del programa de doctorado que Helio Piñón dirige en la Escola Tècnica Superior d'Arquitectura de Barcelona (ETSAB). Este opúsculo contiene una descripción somera de los argumentos que centran dicho programa, además de la relación de los temas que lo vertebran y la bibliografía básica necesaria para documentar su estudio. Las ilustraciones evocan el universo visual que se recorre y testifican el empeño visualista que anima el programa de revisión de la modernidad que aquí se aborda.

Le Corbusier y Sudamérica Fernando Pérez Oyarzún, 1991

Precisions on the Present State of Architecture and City Planning Le Corbusier, 2015-03 Coinciding with the 50th anniversary of his death (August 27, 2015), one of Le Corbusier's most significant books becomes available again in English. We are doing a reprint of MIT Press's first edition of 1991, which again is based on the original French version of 1930, with an introduction added by the author in 1960. While the MIT Press version had black-and-white illustrations throughout, Park Books' new edition features some of Le Corbusier's drawings in color as they were in the earlier French editions. A new essay by British scholar Tim Benton, written for this new edition, contextualizes the book within Le Corbusier's oeuvre and comments on its lasting significance. An also new appendix explains specialist terms and provides background information on persons and historic events no longer necessarily known to a younger generation of architects. The *Precisions*, as the book is known commonly, emerged from a spontaneous and exuberant series of 10 lectures Le Corbusier gave in Buenos Aires during the fall of 1929. As he spoke, Le Corbusier improvised drawings on large sheets of paper with crayons. While similar drawings appear in other works, here all the lectures and images appear in their original context as Le Corbusier assembled them more than 80 years ago. The texts reflect a new maturity in Le Corbusier's thinking and an extreme confidence in the development of his ideas. The drawings and lectures are unique in their eloquent and concise summary of his philosophy of architecture and urban design, stating the principles that informed his work from the 1920s on. They contain some of his most compelling aphorisms, both verbal and visual, covering technique as the basis of architecture, the human scale in design, furniture, the private house, apartments and office buildings, the city, the League of Nations competition, teaching architecture, and a splendid analysis of the transformation of his own work in houses from La Roche-Jeanneret to the Villa Savoye. [Based on MIT Press's copy for their 1991 edition]

25 PRINCIPIOS DE ARQUITECTURA Carlos Ruben Cardenas, 2022-03-23 Este libro colecciona una selección de 216

citas, frases, definiciones y pensamientos de autores célebres con el propósito de estudiar aspectos teóricos de la disciplina y con el fin de lograr entender mejor la arquitectura. Todas las citas están clasificadas según categorías llamados principios y ordenados alfabéticamente. A su vez, cada cita remite a una nota por tema y autor, incluye el número de página y garantiza la veracidad de las frases. Los principios corresponden a reconocidos autores y tienen un significado en la historia de la arquitectura. Hay conceptos que han sido excluidos por considerarlos dentro de un principio nombrado. Con respecto a la selección de los pasajes célebres y su orden, los mismos fueron extraídos de libros propios. La colección de principios son: arte, atmósfera, belleza, color, construcción, contexto, cuerpo, espacio, estructura, experiencia, forma, geometría, idea, lugar, luz, materiales, orden, ornamento, programa, proporción, representación, sentido, superficie, tiempo y tipo.

El proceso creativo Alberto Dallal, 2006 Papers presented during the 26th edition of the International Colloquium of Art History an event focused on the study of the creative activity in architecture and art from the creator's point of view, analyzing the artists, their influences and development, the external elements that intervene in the creation of art and ultimately in the understanding of the creative process.

International Design Organizations Jeremy Aynsley, Alison J. Clarke, Tania Messell, 2022-01-13 This innovative volume brings together international design scholars to address the history and present-day status of national and international design organizations, working across design disciplines and located in countries including Argentina, Turkey, Estonia, Switzerland, Italy, China and the USA. In the second half of the 20th century, many non-governmental organizations were created to address urgent cultural, economic and welfare issues. Design organizations set out to create an international consensus for the future direction of design. This included enhancing communication between professionals, educators and practitioners, raising standards for design, and creating communities of designers across linguistic, national and political borders. Shared needs and agendas were identified and categories of design constantly defined and re-defined, often with overt cultural and political intents. Drawing on an impressive range of original research, archival sources and oral testimony, this volume questions the aims and achievements of national and international design organizations in light of their subsequent histories and their global remits. The Cold War period is central to the book, while many chapters draw on post-colonial perspectives to interpret how transnational networks and negotiations took place at events and congresses, and through publication.

Espacios de relación y soporte en la vivienda colectiva moderna Sara de Giles Dubois, 2023-05-11 Este libro es el resultado de una investigación constante realizada a lo largo de la profesión de la autora, como arquitecta que construye, como profesora universitaria y como investigadora. Pese a tener un desarrollo acotado históricamente en el siglo XX, concretamente desde principios de los años veinte hasta finales de los años setenta, este trabajo se origina a raíz de una serie de reflexiones que arrancan desde la actualidad. Estos interrogantes se enmarcan con el paisaje de fondo de los

espacios de relación entre los usuarios, y la búsqueda de nuevas tipologías y soportes para el habitar colectivo, en respuesta a las necesidades de la ciudad contemporánea y las personas que las habitamos. Generado como si se tratara del proceso de desarrollo de un proyecto, trata de indagar en la Modernidad, en sus mentalidades, proyectos, realidades y utopías que son imprescindibles para plantear un cambio de estrategia en el proyecto de vivienda colectiva hoy. Por tanto, esta investigación-proyecto, no es una investigación histórica, sino una que desempolva precedentes que son casi recientes. Todo ello para colocar el punto de partida del proyecto desde el conocimiento de lo ya avanzado y lo ya propuesto. Quien realice una lectura sin perder la perspectiva del momento presente, comprenderá las circunstancias que originaron aquellas arquitecturas domésticas colectivas y tendrá las herramientas para reflexionar sobre cuáles serían las alternativas que podrían aportarse hoy de acuerdo con las demandas de la sociedad actual. El lector aprenderá indudablemente del potencial, logros, carencias y fracasos de la arquitectura moderna reciente, pudiendo así fijar el punto de partida hoy, para el desarrollo e investigación acerca del proyecto de la vivienda colectiva contemporánea.

Rogelio Salmona Albornoz Rugeles, Cristina, 2019-04-01 Este libro ahonda en una época definitiva en la vida de Rogelio Salmona. Testimonios, documentos de archivo e imágenes complementan e ilustran los hechos más relevantes ocurridos en la etapa previa a su ejercicio profesional en Colombia y anticipan su consecuente postura y los planteamientos de su arquitectura y de su idea de ciudad. En conversación con el arquitecto, recupera experiencias tempranas en las que se ponen de relieve el papel desempeñado por Pierre Francastel y el impacto de sus cursos en la Sorbona, así como de los viajes de estudio. Estas experiencias se concretaron en la definición del material visual y bibliográfico que Salmona trajo a Colombia para dictar los cursos de historia de la arquitectura en la Universidad de los Andes. Un porcentaje recuperado de ese material se puede apreciar en esa publicación.

El inmigrante sincrético Mauricio Pinilla Acevedo, 2025-05-08 El inmigrante sincrético explora la obra del arquitecto Leopoldo Rother, quien se estableció en Colombia en 1936. En el libro, que nace a partir de la tesis doctoral del profesor Mauricio Pinilla Acevedo en la Universidad Nacional de Colombia, se proponen relaciones inéditas entre la base politécnica de la educación recibida por Rother, el riquísimo ambiente cultural de la Alemania socialdemócrata y de la Europa de entreguerras y la influencia poderosa que sobre su sensibilidad ejercieron el paisaje y el clima de nuestro trópico. El autor sugiere cómo la personalidad sobria y generosa de Rother y las difíciles circunstancias de su vida como expatriado influyeron en la creación de la magnífica arquitectura que legó a nuestro país.

HABITAR. TEXTOS DE ARQUITECTURA ESCRITOS EN EL TIEMPO ALONSO GARCÍA EUSEBIO, 2025-01-14 Las vacas regurgitan el alimento que, previamente, han almacenado en el llamado cuarto estómago para masticarlo lentamente. Elogiamos con Nietzsche la práctica rumiante de volver a pensar sobre lo ya pensado, lo pensado por nosotros mismos y lo que otros pensaron antes. Entre Borromini y el cine, distintos temas van sucediéndose en el libro. Sus palabras clave revelan

una urdimbre conceptual común de la relación entre todos ellos que hemos estructurado según un orden temático, vinculado a la experiencia del Habitar. Estas reflexiones, alentadas por la práctica docente y profesional de las últimas décadas, han sido agrupadas en cinco capítulos, con tres textos cada uno. Al primer capítulo Estrategias de(l) proyecto (de habitar) lo siguen cuatro modos de habitar: Habitar en el espacio doméstico, Habitar en el espacio público y la ciudad, Habitar en el tiempo y la memoria, Habitar después del cine. El libro recoge esta mirada crítica y reflexiva como metodología proyectual e investigadora, tanto en su estructura conceptual como en los procesos de pensamiento de cada uno de los proyectos arquitectónicos expuestos.

Vísperas del urbanismo en Latinoamérica, 1870-1930 Arturo Almandoz, Macarena Ibarra, 2018-03-21 Este volumen registra antecedentes conducentes a la emergencia del urbanismo y la planificación en América Latina y, al mismo tiempo, pone dichos antecedentes en perspectiva con el desarrollo de la disciplina a nivel internacional. Los capítulos oscilan entre pioneros urbanistas en debates de Santiago y otras ciudades chilenas; ensanches y nuevos espacios de poder en Ciudad de Guatemala; propuestas visionarias para Ciudad de México; controversias y trama inicial del urbanismo en Buenos Aires y Rosario; y las propuestas de Donat-Alfred Agache y Le Corbusier para Río de Janeiro en la década de 1930.

The Technical Imagination Beatriz Sarlo, 2008 *The Technical Imagination* explores how technology entered the popular imagination in the Argentina of the 1920s and 1930s and how its products helped to shape modern thinking at all levels of Argentine society.

Spectacle and Topophilia David R. Castillo, Bradley J. Nelson, 2012 Significant places and spaces, from Granada and Catalonia to Buenos Aires and the Chicago Columbian Exposition

BUENOS AIRES. UNA TRILOGIA METROPOLITANA Alberto Varas, 2021-08-12 Buenos Aires, una trilogía metropolitana condensa en un solo tomo una revisión revisada y aumentada de dos libros anteriores, Buenos Aires Metrópolis (1997) y Buenos Aires Natural + Artificial (2000) más un material inédito referido al patrimonio y la transformación urbana. Este volumen y los que lo antecedieron tienen origen en un proyecto de investigación en arquitectura y urbanismo que emprendimos inicialmente con Jorge Silvetti, con el apoyo de las Universidades de Harvard, Palermo y Buenos Aires. No trata sobre planificación urbana ni pretende dar una visión integral o cuantitativa de los problemas urbanos. Trata en cambio, de enfocar sobre la cuestión del urbanismo desde su resultado final: la ciudad construida, la arquitectura, el espacio público y las nuevas formas de la presencia de la Naturaleza en la ciudad. Su orientación está basada en la elemental suposición de que la arquitectura y el urbanismo, son disciplinas que, a pesar de las dificultades y carencias diversas que presenta la evolución actual de las ciudades -en particular Buenos Aires y otras grandes metrópolis latinoamericanas, mantienen la cualidad de ser capaces de interpretar de la mejor manera el conjunto de requerimientos simbólicos, funcionales y tecnológicos que la actual sociedad latinoamericana demanda para la creación de su hábitat artificial. Este libro que es, por

otro lado, producto de la enorme atracción que es capaz de generar una ciudad como Buenos Aires, intenta ser una contribución preliminar -proyectual- que permita comprender las transiciones que actualmente tienen lugar en su paisaje urbano y su espacio público, abriendo el camino a quienes tienen a su cargo las decisiones sobre la ciudad y a aquellos que se interesan por sus problemas y por la arquitectura.

Cruelty and Utopia Jean-François Lejeune, Centre international pour la ville, l'architecture et le paysage, 2005-02-03
This landmark collection of illustrated essays explores the vastly underappreciated history of America's other cities -- the great metropolises found south of our borders in Central and South America. Buenos Aires, So Paulo, Mexico City, Caracas, Havana, Santiago, Rio, Tijuana, and Quito are just some of the subjects of this diverse collection. How have desires to create modern societies shaped these cities, leading to both architectural masterworks (by the likes of Luis Barragn, Juan O'Gorman, Lcio Costa, Roberto Burle Marx, Carlos Ral Villanueva, and Lina Bo Bardi) and the most shocking favelas? How have they grappled with concepts of national identity, their colonial history, and the continued demands of a globalized economy? Lavishly illustrated, *Cruelty and Utopia* features the work of such leading scholars as Carlos Fuentes, Edward Burian, Lauro Cavalcanti, Fernando Oayrzn, Roberto Segre, and Eduardo Subirats, along with artwork ranging from colonial paintings to stills from Chantal Akerman's film *From the Other Side*. Also included is a revised translation of Spanish King Philip II's influential planning treatise of 1573, the *Laws of the Indies*, which did so much to define the form of the Latin American city.
