Schooling Indifference John I'Anson,Alison Jasper,2017-06-14 This book is concerned with re-imagining Religious Education (RE) as this is practiced in schools, colleges and universities throughout the UK and in a wide variety of international educational contexts. On the basis of a critical analysis of current theory and practice in RE the authors argue that this educational framing is no longer plausible in the light of new theoretical developments within the academy. A new educational approach to RE is outlined that challenges students to think and practice differently. This includes a 'becoming ethnographer' that can acknowledge socio-material relations and engage the broader literacies necessary for such study. Part One examines how RE has been constructed as a discipline in historical and spatial terms that abstract its study from material concerns. In Part Two, the authors offer some new starting points: Spinoza, Foucault and feminist theory that differently foreground context and relationality, and 'Islam' read as a discursive, located tradition rather than as 'world view'. Finally, Part Three proposes a new trajectory for research and practice in RE, with the aim of re-engaging schools, colleges and universities in a dialogue that promotes thinking and practice that - as educational - is continually in touch with the need to be critical, open-ended and ethically justifiable.

Sailmaker Alan Spence,1988 First performed by the Traverse Theater Club in Edinburgh, this play is imaginative, alive with its character's humour and optimism. It is also sad and haunting. Ideal for Standard Grade English, it will also appeal to all those who like Glaswegian dialogue.

Consciousness and Being Robert C. Trundle,2019-02-14 This book is of vital interest to anyone who yearns to know how science, theology, ethics, art, and politics do really afford objective truths. Not only that, but how these truths in seemingly clashing areas are interrelated by common sense and rooted in our incontrovertible consciousness of Being itself. Being itself, as the basis for truth, is defended against truth-denying modern philosophers who, having headed in the wrong direction with tragic costs of murderous ideologies, have completely misunderstood the simple origin of truth in the realist tradition of Aristotle, Aquinas, Etienne Gilson, and others. Their profoundness is not bamboozled by the covert and corrupting sophism of today's teachings. Anyone interested in surmounting these teachings that include political correctness and a false divide of fact from value, which paralyze the very modern ethics that helped to create them, should read this book. The book reveals how ethics, art, and politics can be as true as the sciences that inform them.
