Although the patient education is an important nursing intervention,
a number of studies showed that surgical patients receive
information mostly from doctors[1,16,24,25] and in the following
from nurses.[26-28] In the present study, most of the patients
received education about deep breathing exercises from nursing
students. This result shows

3. If performing a throat culture on a symptomatic person, consider wearing a surgical mask. 4. Wear clean gloves and loosen the swab collection container, if applicable. 5. Ask the person to tilt their head back slightly, open their mouth as wide as possible. 6. Depress the person's tongue and ask them to say, "Ahh." 7.

[Salicylates Nursing Pharmacology and Study Guide](#)

Neurologic assessment doesn't just take place in neuro units and the ED. A patient who doesn't have a neurologic diagnosis may also require a neuro assessment; for example, a patient with pneumonia can develop neurologic changes due to hypoxia or a post-op patient may have a neurologic deficit due to blood loss.

[Evidence-based nursing practice: why is it important?](#)

Postoperative nursing care should involve closely monitoring the patient for warning signs. Surgical site infections have many implications including: Farrell, M & Dempsey, J 2013, Smeltzer and Bare's Textbook of Medical-Surgical Nursing, 3rd edn,

[Respiratory Failure Nursing Care Plan | RNSpeak](#)

Evidence-based practice has gained momentum in nursing, and definitions vary widely. Research findings, knowledge from basic science, clinical knowledge, and expert opinion are all considered "evidence"; however, practices based on research findings are more likely to result in the desired patient outcomes across various settings and geographic locations.

Feb 11, 2021 · The pituitary gland is located in the skull in the bony sella turcica under a layer of dura mater. It is divided into three lobes: an anterior lobe, a posterior lobe, and an intermediate lobe. The anterior lobe produces stimulating hormones in response to hypothalamic stimulation. The pituitary lobe stores ADH and oxytocin. The intermediate lobe produces endorphins and ...
