Delivering Quality Healthcare for People With Disability Suzanne C. Smeltzer, 2021-01-18 Disability is a universal aspect of the human experience. It will affect all of us, either directly or indirectly, at some point in our lives. Healthcare professionals frequently provide care for and communicate with people who have disability. Many care providers have acknowledged that additional education would help them deliver optimal evidence-based care. The educational gap has broad implications and repercussions for the care of this population. Delivering Quality Healthcare for People With Disability provides a road map for nurses, nursing students, and other healthcare professionals to deliver quality healthcare for individuals with disability. From social determinants of health to disability models to an understanding of different types of disability, author Suzanne Smeltzer helps nurses take the lead in redefining education and addressing the needs of people with disability.

Chapters discuss how simulation can be used with such diverse populations as medical-surgical, geriatric, pediatric, trauma, obstetric, and home care. The book offers scenario-running instructions, as well as recommendations on developing faculty, integrating point-of-care decision-making tools and necessary equipment, how to set up a lab (including static to high-fidelity manikins), and much more. cultural diversity. A template for creating scenarios spans the text and includes student preparation materials, forms, and checklists.
