Shooting the Moon Frances O'Roark Dowell,2009-10-27 JAMIE THINKS HER FATHER CAN DO ANYTHING.... UNTIL THE ONE TIME HE CAN DO NOTHING. When twelve-year-old Jamie Dexter's brother joins the Army and is sent to Vietnam, Jamie is plum thrilled. She can't wait to get letters from the front lines describing the excitement of real-life combat: the sound of helicopters, the smell of gunpowder, the exhilaration of being right in the thick of it. After all, they've both dreamed of following in the footsteps of their father, the Colonel. But TJ's first letter isn't a letter at all. It's a roll of undeveloped film, the first of many. What Jamie sees when she develops TJ's photographs reveals a whole new side of the war. Slowly the shine begins to fade off of Army life - and the Colonel. How can someone she's worshipped her entire life be just as helpless to save her brother as she is? From the author of the Edgar Award-winning Dovey Coe comes a novel, both timely and timeless, about the sacrifices we make for what we believe and the people we love.

The Bullet Journal Method Ryder Carroll, 2021-12 THE NEW YORK TIMES BESTSELLER Transform your life using the Bullet Journal Method, the revolutionary organisational system and worldwide phenomenon. The Bullet Journal Method will undoubtedly transform your life, in more ways than you can imagine' Hal Elrod, author of The Miracle Morning In his long-awaited first book, Ryder Carroll, the creator of the enormously popular Bullet Journal organisational system, explains how to use his method to: * TRACK YOUR PAST: using nothing more than a pen and paper, create a clear, comprehensive, and organised record of your thoughts and goals. * ORDER YOUR PRESENT: find daily calm by prioritising and minimising your workload and tackling your to-do list in a more mindful and productive way. * PLAN YOUR FUTURE: establish and appraise your short-term and long-term goals, plan more complex projects simply and effectively, and live your life with meaning and purpose. Like many of us, Ryder Carroll tried everything to get organised - countless apps, systems, planners, you name it. Nothing really worked. Then he invented his own simple system that required only pen and paper, which he found both effective and calming. He shared his method with a few friends, and before long he had a worldwide viral movement. The system combines elements of a wishlist, a to-do list, and a diary. It helps you identify what matters and set goals accordingly. By breaking long-term goals into small actionable steps, users map out an approachable path towards continual improvement, allowing them to stay focused despite the crush of incoming demands. But this is much more than a time management book. It's also a manifesto for what Ryder calls intentional living: making sure that your beliefs and actions align. Even if you already use a Bullet Journal, this book gives you new exercises to become more calm and focused, new insights on how to prioritise well, and a new awareness of the power of analogue tools in a digital world. *** This book has been printed with three different colour designs, black, Nordic blue and emerald. We are unable to accept requests for a specific cover. The different covers will be assigned to orders at random. ***

Lunar Returns John Townley, 2003 Every month the Moon above comes back to where it was exactly when you were born. Called the Lunar Return, the chart cast for this instant tells the tale of the next 27 1/2 days to come. It paints your emotional landscape day by day and reveals the tides that wash over your life as the Moon drives her daily course. Once a primary tool of every professional astrologer, this invaluable technique has often been neglected because of its demanding subtlety and complexity. In this book, long-time astrological innovator John Townley has cut to the core of how and why to use the Lunar Return, giving the student or professional astrologer the keys to the heart and the pulse of each and every month.

Astronomical Discoveries You Can Make, Too! Robert K. Buchheim, 2015-05-28 You too can follow in the steps of the great astronomers such as Hipparchus, Galileo, Kepler and Hubble, who all contributed so much to our modern understanding of the cosmos. This book gives the student or amateur astronomer the following tools to replicate some of these seminal observations from their own homes: With your own eyes: Use your own observations and measurements to discover and confirm the phenomena of the seasons, the analemma and the equation of time, the logic behind celestial coordinates, and even the precession of the equinoxes. With a consumer-grade digital camera: Record the changing brightness of an eclipsing binary star and show that a pulsating star changes color as it brightens and dims. Add an

inexpensive diffraction grating to your camera and see the variety of spectral features in the stars, and demonstrate that the Sun's spectrum is similar to one particular type of stellar spectrum. With a backyard telescope: Add a CCD imager and you can measure the scale of the Solar System and the distance to a nearby star. You could even measure the distance to another galaxy and observe the cosmological redshift of the expanding universe. *Astronomical Discoveries You Can Make, Too!* doesn't just tell you about the development of astronomy; it shows you how to discover for yourself the essential features of the universe.
