Psychology And Deterrence Perspectives On Security

Social Psychology
The annihilation of more than two thousand years of one of the most ancient literary traditions, this volume also represents the achievements of four hundred years of Western scholarship on China. The selections include poetry, drama, fiction, songs, prose, and essays. They are divided into the following four parts: Early Chinese civilization; the development of Early Chinese philosophy and thought, and the impact of the early Chinese literature; modern Chinese civilization; and the development of modern Chinese philosophy and thought. The Chinese characters in the volume are presented phonetically and are systematically converted into Roman orthography. The English translations are based on the authoritative text of the Chinese literature and provide accurate and complete renditions of its original content. The volume is intended for those interested in Chinese literature, philosophy, and intellectual history, as well as for those who are interested in comparative literature and cultural studies.

two new theory in several core narratives: Germany’s initiation and escalation of the 1905 and 1911 Moroccan crises, the United States’ involvement in the Korean War in 1950-52, and Japan’s entanglement in the second Chinese-Japanese war in 1937-45 and its role in the war in 1940-42.

The Oxford Companion to American Military History

This is the first of four volumes to be published as part of this book series, on the life and work of Richard Ned Lebow. In a career spanning six decades, Richard Ned Lebow has made important contributions to the study of international relations, political philosophy, political psychology, and the history of ideas. He has authored, coauthored, edited, or translated 80 books and more than 250 peer-reviewed articles. These four volumes are excerpts from the corpus. The first volume includes an intellectual autobiography, bibliography, and assessments of Lebow’s contributions to diverse fields of research and thought. It includes a chapter on his scholarship’s agenda, with essays by leading scholars of political philosophy, political psychology, and the history of ideas. The second volume focuses on the intellectual biography of Richard Ned Lebow, his education, and his career. The third volume covers the intellectual biography of Richard Ned Lebow, his education, and his career. The fourth volume covers the intellectual biography of Richard Ned Lebow, his education, and his career.

Understanding Deterrence

Theories of Political Processes

This timely collection explores trust research from many angles and offers a coherent understanding of the potential of cross-disciplinary collaboration to deepen our understanding of institutional trust. Citing, among other things, current breakdowns of trust in new media and the Internet, this book presents a multidisciplinary theory of trust in institutional trust and non-institutional trust. The book presents a novel concept for measuring power in international relations by outlining a composite index on aggregated power (CIAP) that includes 55 variables for 44 regional and international interactions in a period of 50 years. Moreover, it develops a middle power theory that outlines the significance of middle powers in times of major power shifts. By addressing political, military, and economic cooperation via a structured focused comparison and by applying a comparative historical analysis, the book analyses in depth the bilateral relations of regional middle powers to Washington and Beijing.

Escalation and Negotiation in International Conflicts

A primer on enduring issues of U.S. national security strategy

Interdisciplinary Perspectives on Trust

For well over a decade researchers in international relations have sought ways to combine the rigor of quantitative techniques with the richness of qualitative data. Many have discovered that artificial intelligence computer models allow them to do the job. This volume of original essays, distinguished scholars present a new way of thinking about the intersection of the two fields.

The Logic of Images in International Relations

Deterrence, Choice, and Crime, Volume 23

For decades, the national actor model served as the preferred guide for U.S. deterrence policy. It has become a common and comforting guide because it requires little detailed knowledge of an opponent’s unique decision-making process and yet typically provides generalized conclusions about how deterrence works. The model tends to identify common decision-making parameters across the globe to reach generalizations about how deterrence will function and the types of effects that will be “meaningful” or “deterrent.” The model questions of unique factors can affect an opponent’s perception and decision, and these are not necessarily captured by the national actor model. The absence of uniformly means that there are very few deterrence generalizations generated by the use of the national actor model that are applicable to the entire range of opponents. Understanding Deterrence provides a new way to think about policy, history, politics, and psychology, while also offering a new way to understand the developing international community.

System Effects

This textbook provides a comprehensive introduction to peace psychology covering interdisciplinary practice, primary psychological topics, core peace studies topics and terminology.

The Oxford Handbook of Political Psychology

Theories of Political Processes

The book provides step-by-step procedures in how to deliver psychological services to political leaders and political decisions-makers. Divided into three sections, political psychology, political decision making, and modern political management, major issues it includes the reader’s broad range of topics with which all political managers should be familiar.

Richard Ned Lebow: A Pioneer in International Relations Theory, History, Political Philosophy and Psychology

This book investigates complex dynamic processes in the study of political psychology. It includes not only severe polarization in domestic politics, but also other factors that shape the political process. The book presents a novel concept for measuring power in international relations by outlining a composite index on aggregated power (CIAP) that includes 55 variables for 44 regional and international interactions in a period of 50 years. Moreover, it develops a middle power theory that outlines the significance of middle powers in times of major power shifts. By addressing political, military, and economic cooperation via a structured focused comparison and by applying a comparative historical analysis, the book analyses in depth the bilateral relations of regional middle powers to Washington and Beijing.

Perspectives on Deterrence

Patrick Morgan's authoritative study revisits the place of deterrence after the Cold War.

Deterrence in American Foreign Policy: Theory and Practice

This volume examines the place where the concepts and practices of escalation and negotiation meet.

Psychology And Social Policy

Written by leading scholars in the field, Causes of War provides the first comprehensive analysis of the leading theories relating to the causes of both interstate and civil wars. Utilizes historical examples to illustrate individual theories throughout.

Perspectives on Deterrence

This edited volume presents selected papers capturing Herbert Kelman's unique and seminal contributions to the social psychology of conflict analysis and resolution, with a special emphasis on the utility of concepts for understanding and constructively addressing violent and intractable conflicts. Central concepts covered include perceptual processes, basic human needs, group and normative processes, social identity, and intergroup trust, which form the basis for developing interactive methods of conflict resolution.
