**The Emperor of All Maladies** Siddhartha Mukherjee, 2011-08-09 Selected as One of the Best Books of the 21st Century by The New York Times Winner of the Pulitzer Prize, adapted as a documentary from Ken Burns on PBS, this New York Times bestseller is “an extraordinary achievement” (The New Yorker)—a magnificent, profoundly humane “biography” of cancer. Physician, researcher, and award-winning science writer, Siddhartha Mukherjee examines cancer with a cellular biologist’s precision, a historian’s perspective, and a biographer’s passion. The result is an astonishingly lucid and eloquent chronicle of a disease humans have lived with—and perished from—for more than five thousand years. The story of cancer is a story of human ingenuity, resilience, and perseverance, but also of hubris, paternalism, and misperception. Mukherjee recounts centuries of discoveries, setbacks, victories, and deaths, told through the eyes of his predecessors and peers, training their wits against an infinitely resourceful adversary that, just three decades ago, was thought to be easily vanquished in an all-out “war against cancer.” The book reads like a literary thriller with cancer as the protagonist. Riveting, urgent, and surprising, *The Emperor of All Maladies* provides a fascinating glimpse into the future of cancer treatments. It is an illuminating book that provides hope and clarity to those seeking to demystify cancer.

**The Anatomy of the Village** Thomas Sharp, 2013-07-24 Thomas Sharp was a key figure in mid-C20 British planning whose renown stems from two periods in his career. First, he came to attention as a polemical writer in the 1930s on planning issues, including as a virulent opponent of garden cities. His prose tempered over time and this phase perhaps culminated in *Town Planning*, first published in 1940 and reputed to have sold over 250,000 copies. Subsequently the plans he produced for historic towns in the 1940s, such as Oxford, were very well known and were influential in developing ideas of townscape. Started as an official manual on village planning, *The Anatomy of the Village* followed on from the Scott Report, for which Sharp had been one of the Secretaries. When the Ministry decided not to proceed with the publication, Sharp himself published it in 1946. It became one of Sharp's best known works, with lucid prose and generous illustration by photograph and beautiful line-drawings of village plans. The aim of *The Anatomy of the Village* was to set out the main principles of village planning, especially in relation to physical design. *Anatomy* became a key text in thinking about villages in the post-war period; a period when there was great concern that settlements should develop in more sensitive ways than inter-war ribbon and suburban development patterns. The problems of poor quality development, unrelated to settlement

form, was to continue to stimulate books such as Lionel Brett's *Landscape in Distress* and campaigns from the Architectural Review. Reading the text today it still has much to offer: while some of its assumptions about the level of services a village might support clearly belong to another era, its beautiful and simple typological analyses of village form continue to be of relevance.
