Disabled Village Children David Werner, 1987 ... A book of information and ideas for all who are concerned about the well-being of disabled children. It is especially for those who live in rural areas where resources are limited ... Written by [the author] with the help of disabled persons and pioneers in rehabilitation in many countries, this book ... gives a wealth of clear, simple, but detailed information concerning most common disabilities of children: many different physical disabilities,

blindness, deafness, fits, behavior problems, and developmental delay. It gives suggestions for simplified rehabilitation, low-cost aids, and ways to help disabled children find a role and be accepted in the community. Above all, the book helps us to realize that most of the answers for meeting these children's needs can be found within the community, the family, and in the children themselves. It discusses ways of starting small community rehabilitation centers and workshops run by disabled persons or the families of disabled children.-Back cover.

Health Care Revolt Michael Fine,2018-09-01 The U.S. does not have a health system. Instead we have market for health-related goods and services, a market in which the few profit from the public's ill-health. Health Care Revolt looks around the world for examples of health care systems that are effective and affordable, pictures such a system for the U.S., and creates a practical playbook for a political revolution in health care that will allow the nation to protect health while strengthening democracy. Dr. Fine writes with the wisdom of a clinician, the savvy of a state public health commissioner, the precision of a scholar, and the energy and commitment of a community organizer.

Medical Ethics Manual John Reynold Williams,2005

The Right to Health Judith Asher,2010-11-11 The alarmingly low health status of millions of people in many developing countries is now recognised as a major obstacle to the process of development. In response, increasing numbers of non-governmental organizations are championing the right to health of the disadvantaged, vulnerable and those living in poverty. They are using the right to health in their struggle for access to quality health services, as well as the underlying determinants of health, such as safe drinking water and adequate sanitation. In other words, the right to health, and other fundamental human rights, are seen as a way of promoting development. In a clear style and accessible format, this unique, timely and practical Manual shows health professionals, their associations and other interested non-governmental organizations, some of the practical ways in which they can promote, protect and monitor the right to health in their communities and countries. It considers the obligations of states in relation to individuals within their borders, as well as the human rights responsibilities of states beyond their borders. As befits a human rights manual, it has a particular preoccupation with the right to health of the vulnerable, marginalized and otherwise disadvantaged groups and those living in poverty.

Malaria Microscopy Quality Assurance Manual - Version 2 World Health Organization,2016-04-05 The first version of the WHO Malaria microscopy quality assurance manual (2009) was based on recommendations made at a series of informal consultations organized by WHO particularly a bi-regional meeting of the WHO regional offices for South-East Asia and the Western Pacific in April 2005 in Kuala Lumpur Malaysia followed by informal consultations held in March 2006 and February 2008 in Geneva Switzerland. Subsequently extensive consultations among international malaria experts led to consensus and preparation of the manual. This second version of the Manual is based on the recommendations of experts made at a WHO technical consultation in March 2014 in Geneva Switzerland. The aim of the meeting was to review the experiences of national malaria control programmes (NMCPs) national reference laboratories (NRLs) and technical agencies in using the Manual and country experience in order to improve systems for managing the quality of malaria microscopy. This second version takes into account the many years of experience of several agencies in the various aspects of quality assurance (QA) described in the Manual. In particular the sections on assessment of competence in malaria microscopy are

based on use of this method by the WHO regional offices for South-East Asia and the Western Pacific in collaboration with the WHO Coordinating Centre for Malaria in Australia and by the WHO Regional Office for Africa in collaboration with Amref Health Africa. The section on setting up and managing an international reference malaria slide bank is based on the work of the WHO Regional Office for the Western Pacific in collaboration with the WHO Coordinating Centre for Malaria Diagnosis in the Philippines. The section on proficiency testing for malaria microscopy is based on work in the WHO Regional Office for Africa in collaboration with the National Institute for Communicable Diseases in South Africa and experience in regional initiatives by Amref Health Africa. The section on slide validation is based on work by Médecins sans Frontières and the section on outreach training and supportive supervision (OTSS) is based on work by the President's Malaria Initiative Malaria Care Project Medical Care Development International and Amref Health Africa. The Manual is designed primarily to assist managers of NMCPs and general laboratory services responsible for malaria control. The information is also applicable to nongovernmental organizations (NGOs) and funding agencies involved in improving quality management systems for malaria microscopy. The Manual is not designed for QA of microscopy in research situations such as in clinical trials of new drugs and vaccines or for monitoring parasite drug resistance. It forms part of a series of WHO documents designed to assist countries in improving the quality of malaria diagnosis in clinical settings including the revised training manuals on Basic malaria microscopy (2010) and the Bench aids for malaria microscopy (2010).

Wilderness and Rescue Medicine Jeffrey Isaac, Wma, David E. Johnson, 2012-03-13 A Guide to Practicing Medicine in Challenging Environments Wilderness and Rescue Medicine: A Practical Guide for the Basic and Advanced Practitioner provides the critical insight and tools required to practice medicine in remote or challenging environments. There is no place in field medicine for unreasonable restrictions on the practical application of medical judgment—that is the guiding philosophy of this user-friendly guide. Wilderness and Rescue Medicine: A Practical Guide for the Basic and Advanced Practitioner provides:

- The most up-to-date guidance on practicing medicine in a wilderness context
- An introduction to critical body systems and the general principals of trauma
- Specific information on environmental and backcountry medicine

The Anatomy of the Village Thomas Sharp, 2013-07-24 Thomas Sharp was a key figure in mid-C20 British planning whose renown stems from two periods in his career. First, he came to attention as a polemical writer in the 1930s on planning issues, including as a virulent opponent of garden cities. His prose tempered over time and this phase perhaps culminated in *Town Planning*, first published in 1940 and reputed to have sold over 250,000 copies. Subsequently the plans he produced for historic towns in the 1940s, such as Oxford, were very well known and were influential in developing ideas of townscape. Started as an official manual on village planning, *The Anatomy of the Village* followed on from the Scott Report, for which Sharp had been one of the Secretaries. When the Ministry decided not to proceed with the publication, Sharp himself published it in 1946. It became one of Sharp's best known works, with lucid prose and generous illustration by photograph and beautiful line-drawings of village plans. The aim of *The Anatomy of the Village* was to set out the main principles of village planning, especially in relation to physical design. *Anatomy* became a key text in thinking about villages in the post-war period; a period when there was great concern that settlements should develop in more sensitive ways than inter-war ribbon and suburban development patterns. The problems of poor quality development, unrelated to settlement form, was to continue to stimulate books such as Lionel Brett's *Landscape in Distress* and campaigns from the *Architectural Review*. Reading the text today it still has much to offer: while some of its assumptions about the level of services a village might support clearly belong to another era, its beautiful and simple typological analyses of village form continue to be of relevance.

Medical Bondage Deirdre Cooper Owens, 2017-11-15 The accomplishments of pioneering doctors such as John Peter Mettauer, James Marion Sims, and Nathan Bozeman are well documented. It is also no secret that these nineteenth-century gynecologists performed experimental caesarean sections, ovariectomies, and obstetric fistula repairs primarily on poor and powerless women. *Medical Bondage* breaks new ground by exploring how and why physicians denied these women their full humanity yet valued them as “medical superbodies” highly suited for medical experimentation. In *Medical Bondage*, Cooper Owens examines a wide range of scientific literature and less formal communications in which gynecologists created and disseminated medical fictions about their patients, such as their belief that black enslaved women could withstand pain better than white “ladies.” Even as they were advancing medicine, these doctors were legitimizing, for decades to come, groundless theories related to whiteness and blackness, men and women, and the inferiority of other races or nationalities. *Medical Bondage* moves between southern plantations and northern urban centers to reveal how nineteenth-century American ideas about race, health, and status influenced doctor-patient relationships in sites of healing like slave cabins, medical colleges, and hospitals. It also retells the story of black enslaved women and of Irish immigrant women from the perspective of these exploited groups and thus restores for us a picture of their lives.
