*Comprehensive Aphasia Test* Taylor & Francis Group,2021-12-28

**A Guide to Clinical Assessment and Professional Report Writing in Speech-Language Pathology** Cyndi Stein-Rubin,Renee Fabus,2024-06-01 Learning to assess speech and language disorders and write diagnostic reports may be an overwhelming experience, especially when most texts don't cover both topics at once. With that in mind, *A Guide to Clinical Assessment and Professional Report Writing in Speech-Language Pathology, Second Edition* combines the latest assessment protocols and diagnostic techniques with vital diagnostic report writing tools into a single definitive guide. Cyndi Stein-Rubin, Renee Fabus, and their contributors recognize that clinical assessment is inextricably linked to report writing and have updated this Second Edition to synthesize the two. Following the introductory chapters, which discuss the basics of assessment and report writing, each subsequent chapter focuses on a particular disorder, provides in-depth assessment tools, and presents a corresponding sample report. Key Features: An inventory and explanation of formal and informal assessment measures A glossary of key vocabulary Sample case histories with assessment tools Relevant and useful interview questions Each disorder's background and characteristics Assessment parameters A differential diagnosis section A model report The accessible format of *A Guide to Clinical Assessment and Professional Report Writing in Speech-Language Pathology, Second Edition* will help students learn how to assess and document speech and language disorders and will also make for a perfect reference for them as clinicians for years to come.

*Clinical Cases in Augmentative and Alternative Communication* Martine M. Smith,2023-03-15 *Clinical Cases in Augmentative and Alternative Communication* provides a concise introduction to the rapidly expanding field of augmentative and alternative communication (AAC). It brings together internationally renowned experts in the field to discuss its application and outline key principles of intervention to support communication using AAC. Carefully grounded in evidence-based clinical practice, the book highlights the diversity of potential applications for AAC across a wide range of client groups, including children and adults with developmental disabilities, as well as adults with acquired impairments. Most of the chapters are structured as case reports following CARE guidelines and highlight key principles for intervention that are grounded in clinical practice. The chapters also include reflections on communication through AAC and the valuable

contributions that AAC can make in supporting independence and enhancing quality of life. This accessible book is ideal reading for students, novice clinicians in the fields of speech and language therapy or pathology, and professionals who are new to this area of clinical practice.

*Functional Assessment for Adults with Disabilities* National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, Committee on Functional Assessment for Adults with Disabilities, 2019-08-31 The U.S. Social Security Administration (SSA) provides disability benefits through the Social Security Disability Insurance (SSDI) and Supplemental Security Income (SSI) programs. To receive SSDI or SSI disability benefits, an individual must meet the statutory definition of disability, which is the inability to engage in any substantial gainful activity [SGA] by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. SSA uses a five-step sequential process to determine whether an adult applicant meets this definition. *Functional Assessment for Adults with Disabilities* examines ways to collect information about an individual's physical and mental (cognitive and noncognitive) functional abilities relevant to work requirements. This report discusses the types of information that support findings of limitations in functional abilities relevant to work requirements, and provides findings and conclusions regarding the collection of information and assessment of functional abilities relevant to work requirements.

*Encyclopedia of Clinical Neuropsychology* Jeffrey Kreutzer, John DeLuca, Bruce Caplan, 2018-07-14 This encyclopedia serves as a unified, comprehensive reference for professionals involved in the diagnosis, evaluation, and rehabilitation of persons with neuropsychological and cognitive disorders. Presented in a traditional A-Z format, the encyclopedia addresses assessment strategies, behavioral syndromes and disorders, care systems, diagnosis and diagnostic labels, educational and forensic issues, neuroimaging modalities and techniques, prominent scientists in the field, psychopharmacology, professional issues, rehabilitation interventions, neuropsychological test batteries, and much more. Includes illustrations, tables, and recommendations for further reading.

**Quality of Life in Aphasia** Linda Worrall, Audrey Holland, 2003 This special issue of the journal *Aphasiology* is dedicated to the topic of quality of life in aphasia.

**An Object and Action Naming Battery** Judit Druks, Jackie Masterson, 2000 This test provides a resource for clinical practice, for aphasia research and for psycholinguistic research. It was developed in response to an acknowledgement of the need for the thorough assessment of verb knowledge in aphasic patients, and with an emphasis on the design of therapies that specifically target verb deficits. The materials will also be useful for research into verb processing and representational differences between verbs and nouns, including brain imaging studies. The Battery consists of line drawings of 162 objects and 100 actions together with ratings for age-of-acquisition, familiarity and imageability of the verbal labels of the pictures.

Visual complexity ratings for the pictures, printed word frequency values of the verbal labels, and information about the syntactic realisation of the action labels are also provided. At least 93% name agreement was achieved in collecting naming responses for each the pictures in the Battery from a group of respondents. The object and action pictures in the Battery are matched on printed word frequency, rated age-of-acquisition, and rated familiarity of the verbal labels. These psycholinguistic variables have been shown to be important predictors of naming performance. The pictures and printed verbal labels can be presented for picture naming, reading, writing to dictation, repetition, semantic classification and can easily be adapted for use in comprehension tests and word-picture verification tasks. The materials can also be used in lexical decision tasks and priming studies.

**Communicative Disorders** Julie G. McAfee Kenneth G. Shipley, 2013-12-11

**Speech and Language** Norman J. Lass, 2014-06-28 *Speech and Language: Advances in Basic Research and Practice*, Volume 11 contains articles that discuss a wide range of topics on speech and language processes and pathologies. This volume is comprised of six contributions on a wide variety of topics on speech and language. The book begins with an examination of approaches to aphasia diagnostics from both a medical and nonmedical perspective. Subsequent chapters cover topics on acoustic-phonetic descriptions of speech production in speakers with cleft palate and other velopharyngeal disorders; the role of infant vocalizations as they relate to subsequent speech and language development; pitch phenomena and applications in electrolarynx speech; and practical applications of neuroanatomy. The final chapter presents the employment of studies of temporal coordination to understand the development of motor control in speech and to provide a basis for testing theories on the development of speech as a motor skill. Linguists, speech pathologists, and researchers on language development will find the book very insightful and informative.

**The Adult Speech Therapy Workbook** Chung Hwa Brewer, 2021-04 THE ADULT SPEECH THERAPY WORKBOOK is your go-to resource for handouts and worksheets. It was designed for speech therapists new to adult speech therapy and covers the most common diagnoses and disorders across all adult speech therapy settings, from hospitals, to skilled nursing facilities, to home health. This workbook is packed with over 580 pages of practical, evidenced-based treatment material.

Frenchay Aphasia Screening Test (FAST) Pamela Mary Enderby, Derick T. Wade, Victorine Wood, 1987

*Analysis of Neurogenic Disordered Discourse Production* Anthony Pak-Hin Kong, 2022-03-07 Analysis of discourse production among speakers with acquired communication disorders is an important and necessary clinical procedure. This book provides a comprehensive review and discussion of aphasia and its related disorders, their corresponding clinical discourse symptoms that speech-and-language pathologists should address, and the different methods of discourse elicitation that are clinically and research oriented. This edition has been thoroughly updated throughout to include the latest research, including advances in word retrieval and discourse production, cognitive and multicultural aspects of disordered discourse

production, application of technology to understand and evaluate spoken discourse, and evidence-based intervention of discourse impairments. Contemporary issues related to disordered/clinical discourse elicitation are added. Recent advancement in discourse analysis is covered and discussions of various treatment options of discourse symptoms are provided. Finally, the manifestation of discourse symptoms as a function of speakers' multilingual/multi-cultural status and specific considerations related to clinical assessment and remediation are explored. As the only introductory text to include comprehensive coverage of basic knowledge of neurogenic disordered discourse, it is a must-read for students, clinicians, and researchers in various fields. Readers will also benefit from plenty of examples that provide a connection between the theoretical contents presented in the text and application to real-life contexts of discourse production.

Rare Diseases Epidemiology: Update and Overview Manuel Posada de la Paz, Domenica Taruscio, Stephen C. Groft, 2017-12-06 The fields of rare diseases research and orphan products development continue to expand with more products in research and development status. In recent years, the role of the patient advocacy groups has evolved into a research partner with the academic research community and the bio-pharmaceutical industry. Unique approaches to research and development require epidemiological data not previously available to assist in protocol study design and patient recruitment for clinical trials required by regulatory agencies prior to approval for access by patents and practicing physicians.

**Case Studies in Communication Disorders** Louise Cummings, 2016-10-06 This is a collection of 48 highly useful case studies of children and adults with communication disorders.

**Acquired Aphasia** Martha Taylor Sarno, 1991 Intended for students, clinicians and researchers in speech pathology as well as linguists, this book provides information from disciplines involved in the study of aphasia. Topics discussed include acquired aphasia in children, the elderly and the head-injured, and recovery and rehabilitation.

**Functional Assessment of Communication Skills for Adults (ASHA FACS)** Carol Frattali, 1995 The ASHA FACS is a measure of basic functional skills that are common to individuals regardless of age, gender, socioeconomic status, education/vocational status, or cultural diversity. The measures provide helpful information in assisting both clinicians and payers.

Discourse in Aphasia Taylor & Francis Group, 2020-09-30 First published in 2012. Routledge is an imprint of Taylor and Francis, an informa company.

Communication Disorders in Multicultural Populations Dolores E. Battle, 2002 Reviews specific communication disorders in diverse ethnic groups, discusses how cultural characteristics affect the assessment and treatment of communication disorders, and examines child-rearing practices, family roles, health care, and education of the major ethnic groups in the US. Aphasia Rehabilitation Nadine Martin, Cynthia K. Thompson, Linda Worrall, 2008 As a consequence of the disability movement, the thinking generated by the World Health Organization's classification of disability and functioning, and an upturn in concern for the long-term consequences of aphasia, it has become apparent that two distinctive pathways for the treatment of aphasia have emerged over the past decade. The first (and most traditional) involves assessment and management directed toward lessening the effects of the impairment of aphasia, while the second pathway focuses less on specific language than on the psychosocial consequences of aphasia. This unique text specifically contrasts impairment- and consequences-focused treatment with the aim of providing clinicians with a level playing field that permits them to evaluate for themselves the relative contributions that each approach provides, to evaluate their relative strengths and weaknesses, and finally to seek common ground. An opening chapter sets the scene, while the heart of the book, based on real cases, concerns five meticulously described, yet hypothetical individuals with aphasia. In each of the cases, detailed descriptions and assessment results are provided and clinical management plans, representing each approach, are presented internationally by recognized expert clinicians.
